

# Garden wildlife recording cards

We all know that gardens can be a valuable habitat for many species of wildlife. Much of the wildlife that can be found in gardens is commonly occurring, but some species are rarer or are in decline and as a result are included in Local Biodiversity Action Plans (LBAP). So that we can get a better understanding of where some key species of wildlife are found in Conwy, we have created a wildlife recording card. There are four LBAP species included on the card that we are interested in: Hedgehog, Bullfinch, Common Lizard and Slow worm. If you see any of these species in your garden then please let us know – you can contact us and we'll post you a copy of the recording card to you to fill out, or you can submit your record to Cofnod (the North Wales Environmental Information Service) on the internet.

To contact us for a card by post please contact:  
Becky Groves, Biodiversity Project Officer: 01492  
575123 or email: [becky.groves@conwy.gov.uk](mailto:becky.groves@conwy.gov.uk)

Or to enter your record online go to:

[www.cofnod.org.uk](http://www.cofnod.org.uk) and click on the garden recording postcard at the bottom of the home page. You'll have to register the first time you use it, but this is free and lets you choose a password to use next time for recording other wildlife. If you are already registered then just log in with your user name and password and click on enter a new record.
