

# UK Shared Prosperity Fund

Interventions, Objectives, Outcomes and Outputs –  
Wales

Version 1  
April 2022

## Interventions, Outputs and Outcomes

To access their allocation, each place will be asked to develop a UKSPF plan that addresses three questions:

- **Local context:** an opportunity for places to set out their local evidence of opportunities and challenges through the lens of the three investment priorities for UKSPF.
- **Selection of outcomes and interventions:** where places will identify the outcomes they wish to target based on local context, and the interventions they wish to prioritise, under each investment priority, from the menu of options. These should be clearly linked to local opportunities and challenges.
- **Delivery:** this will represent the most detailed stage of the investment plans.

In their plans, places will select outputs and outcomes relevant to each UKSPF investment priority. Places will set out measurable outcomes that reflect local needs and opportunities. These should inform the interventions they wish to deliver. Places will be able to choose from investment across three investment priorities of communities and place, local business and people and skills. This will allow local authorities, local partners, the UK Government, and the devolved administrations to monitor progress.

Each place, and each intervention across the UK must use common indicators, as set out for each intervention to measure outputs, outcomes and impacts. This ensures that we can compare similar interventions in different places and undertake and synthesise evaluation activities. It also means that places will be able to work together more easily, and organisations delivering in multiple places will be able to deliver their interventions more efficiently.

**Final indicator definitions will be confirmed in the summer, prior to the submission date of the investment plans, when further guidance will be published on GOV.UK.**

## UKSPF Interventions, Objectives, Outcomes and Outputs Table – Wales
