

Self Assessment Tool

How well does your organisation comply with the 12 guiding principles of the Surveillance Camera Code of Practice? Complete this easy to use self assessment tool to find out if you do.

Using this tool

This self assessment tool has been prepared by the Surveillance Camera Commissioner (SCC) to help you and your organisation identify if you're complying with the [Surveillance Camera Code of Practice](#) (the Code). It should be completed in conjunction with the Code, and can help to show you how well you comply with each of its 12 guiding principles.

It is possible to be largely compliant with some principles and to fall short against others. As a result you will note that at the end of the questions against each principle there is a space to include an action plan. This is so you can put actions in place over the next year to improve your compliance to that principle. These boxes can also be used to make a note of what evidence you could produce if required to show your compliance to that principle.

The template contains a combination of open and closed questions. For the open questions, there is a limit on how much you can write within the template, so please feel free to include any additional notes as an annex to the document – there are additional blank pages at the end of the tool to help you to do so.

Remember that your organisation may operate more than one surveillance camera system, with a scope that extends across several purposes and many geographical locations. So, before you start clarify the scope of the system(s) you propose to self assess for compliance against the Code.

Is this tool for me?

The self assessment tool is aimed primarily at relevant authorities under [Section 33 of the Protection of Freedoms Act 2012](#) who have a statutory duty to have regard to the guidance in the Code. In general terms, this means local authorities and the police in England and Wales.

If you work within any other organisation that operates surveillance camera systems you are free to adopt and follow the principles of the Code on a voluntary basis. If you decide to do so, then using this tool will be of benefit to you.

As a relevant authority under Section 33, if you are considering the deployment of a new surveillance camera system, or considering extending the purposes for which you use an existing system, you may find the more [detailed three stage passport to compliance tool a valuable planning tool](#). It can guide you through the relevant principles within the Code and inform you of the necessary stages when planning, implementing and operating a surveillance camera system to ensure it complies with the Code.

If you are from any other organisation operating a surveillance camera system you may find this template useful in reviewing your use of surveillance, or may want to use other SCC online tools such as the [Data Protection Impact Assessment](#) guidance or the [Buyers Toolkit](#) to help decide whether your surveillance is necessary, lawful and effective.

What should I do next?

The self assessment is for you to satisfy yourself and the subjects of your surveillance that you meet the 12 principles and to identify any additional work necessary to show compliance. Think about realistic timescales for completion of your action plans, with a view to achieving full compliance with the Code before undertaking your next annual review.

The SCC does not want you to submit your completed self assessment response to him. However, in the interest of transparency he encourages you to publish the completed self assessment tool template on your website.

A completed self assessment is also a positive step towards [third party certification](#) against the Code.

Email the SCC at scc@sccommissioner.gov.uk to let us know when you have completed this template as this will enable us to understand the level of uptake. We would also appreciate your comments and feedback on the user experience with this template. Please let us know if you are interested in working towards third party certification against the Code in the near future, or would like to be added to our mailing list.

Name of organisation	Conwy County Borough Council
Scope of surveillance camera system	Conwy Public Space Surveillance Camera Scheme
Senior Responsible Officer	Derek O Connor
Position within organisation	Information Governance Manager
Signature	
Date of sign off	30/10/2020

Principle 1

Use of a surveillance camera system must always be for a specified purpose which is in pursuit of a legitimate aim and necessary to meet an identified pressing need.

1. What is the problem you face and have you defined a purpose in trying to solve it? Have you set objectives in a written statement of need?

As per CCBC Code of Practice section 4.2

4.2 SCHEME OBJECTIVES:

4.2.1. The main objectives of the CCTV are summarised as:

- a) Assist in the detection, prevention and fear of crime,
- b) Facilitate the apprehension and prosecution of offenders in relation to crime and public order,
 - a) Provide residents, visitors and businesses with a greater feeling of safety and security,
 - b) To enhance community safety, boost the economy and encourage greater use of the town centre/shopping mall, etc.,
 - c) To assist the Local Authority in its enforcement and regulatory function,
 - d) To assist with traffic management,

2. What is the lawful basis for your use of surveillance?

A Public Task - as set out in General Data Protection Regulations (GDPR) You can rely on this lawful basis if you need to process personal data to perform a specific task in the public interest that is set out in law.

3. What is your justification for surveillance being necessary and proportionate?

DPA 2018, Part 3 – Allows Conwy Council to act as a competent authority and process personal data including Special Category Information for the prevention, investigation, detection or prosecution of criminal offences.

4. Is the system being used for any other purpose other than those specified? If so please explain.

Yes

No

5. Have you identified any areas where action is required to conform more fully with the requirements of Principle 1?

Action Plan

No

Principle 2

The use of a surveillance camera system must take into account its effect on individuals and their privacy, with regular reviews to ensure its use remains justified.

1. Has your organisation paid a registration fee to the Information Commissioner's Office and informed them of the appointment of a Data Protection Officer (DPO) who reports to the highest management level within the organisation? Yes No

2. Are you able to document that any use of automatic facial recognition software or any other biometric characteristic recognition systems is necessary and proportionate in meeting your stated purpose? Yes No

3. Have you carried out a data protection impact assessment, and were you and your DPO able to sign off that privacy risks had been mitigated adequately? Yes No

Before May 2018 the requirement was to complete a privacy impact assessment; this has been replaced by a data protection impact assessment. There is a surveillance camera specific template on the Surveillance Camera Commissioner's website:

<https://www.gov.uk/government/publications/privacy-impact-assessments-for-surveillance-cameras>

4. Do you update your data protection impact assessment regularly and whenever fundamental changes are made to your system? Yes No

5. How have you documented any decision that a data protection impact assessment is not necessary for your surveillance activities together with the supporting rationale?

NA

6. Have you identified any areas where action is required to conform more fully with the requirements of Principle 2? Yes No

Action Plan

Principle 3

There must be as much transparency in the use of a surveillance camera system as possible, including a published contact point for access to information and complaints.

7. Has there been proportionate consultation and engagement with the public and partners to assess whether there is a legitimate aim and a pressing need for the system? Yes No

8. Does your Privacy Notice signage highlight the use of a surveillance camera system and the purpose for which it captures images? Yes No

9. Does your signage state who operates the system and include a point of contact for further information? Yes No

10. If your surveillance camera systems use body worn cameras, do you inform those present that images and sound are being recorded whenever such a camera is activated? Yes No

11. What are your procedures for handling any concerns or complaints?

Corporate Complaints Procedure as published on Website www.conwy.gov.uk

12. Have you identified any areas where action is required to conform more fully with the requirements of Principle 3? Yes No

Action Plan

No Body Worn Video,
Ensure DPIA with every additional surveillance camera added to scheme.

Principle 4

There must be clear responsibility and accountability for all surveillance camera system activities including images and information collected, held and used.

13. What governance arrangements are in place?

Corporate Information Governance to include a Data Protection Officer (information Governance Manager) who acts as the CCTV senior responsible officer SRO

14. Do your governance arrangements include a senior responsible officer?

Yes

No

15. Have you appointed a single point of contact within your governance arrangements, and what steps have you taken to publicise the role and contact details?

Yes

No

Guidance on single point of contact: <https://www.gov.uk/government/publications/introducing-a-single-point-of-contact-guidance-for-local-authorities/introducing-a-single-point-of-contact>

Guidance for using CCBC SPOC is published on Conwy's Intranet

<https://intranet.corp.conwy.gov.uk/en/Main/CCTV/Single-Point-of-Contact-for-CCTV-Camera-Systems-and-Surveillance-Equipment.aspx>

16. Are all staff aware of the roles and responsibilities relating to the surveillance camera system, including their own?

Yes

No

17. How do you ensure the lines of responsibility are always followed?

Using the Intranet to direct Staff for guidance and completion of a Surveillance System Asset Register, spot checks on Conwy Sites.

18. If the surveillance camera system is jointly owned or jointly operated, is it clear what each partner organisation is responsible for and what the individual obligations are?

Yes

No

19. Have you identified any areas where action is required to conform more fully with the requirements of Principle 4?

Yes

No

Action Plan

Conwy CCTV is solely owned by CCBC

Principle 5

Clear rules, policies and procedures must be in place before a surveillance camera system is used, and these must be communicated to all who need to comply with them.

20. Do you have clear policies and procedures in place to support the lawful operation of your surveillance camera system? If so, please specify. Yes No

21. Are the rules, policies and procedures part of an induction process for all staff? Yes No

22. How do you ensure continued competence of system users especially relating to relevant operational, technical, privacy considerations, policies and procedures?

Using Conwy CCTV Code of Practice and procedure policy, induction training programme and continual refresher training with staff following any new laws.

23. Have you considered occupational standards relevant to the role of the system users, such as National Occupational Standard for CCTV operations or other similar? Yes No

24. If so, how many of your system users have undertaken any occupational standards to date?

All Conwy CCTV Staff complete initial training using training companies who map to NOS standards e.g. Highfield, ASET etc. for compliance with the Security Industry Authority (SIA)

25. Do you and your system users require Security Industry Authority (SIA) licences? Yes No

26. If your system users do not need an SIA licence, how do you ensure they have the necessary skills and knowledge to use or manage the surveillance system?

NA

27. If you deploy body worn cameras, what are your written instructions as to when it is appropriate to activate BWV recording and when not?

NA no BWV

28. If you deploy surveillance cameras using drones, have you obtained either Standard Permission or Non-Standard Permission from the Civil Aviation Authority and what is your CAA SUA Operator ID Number?

Yes

No

NA no Drones

29. Have you identified any areas where action is required to conform more fully with the requirements of Principle 5?

Yes

No

Action Plan

Consider Refresher training for Operators

Principle 6

No more images and information should be stored than that which is strictly required for the stated purpose of a surveillance camera system, and such images and information should be deleted once their purposes have been discharged.

30. How long is the period for which you routinely retain images and information, and please explain why this period is proportionate to the purpose for which they were captured?

31 days or 1 calendar month as per Conwy CCTV Code of Practice and retention policy. If an incident is identified and request for a download the media is held in a secure video evidence locker as per retention policy. If the media is not collected within a further period of 1 calendar month it is destroyed.

31. What arrangements are in place for the automated deletion of images?

The Conwy CCTV Video Management System (VMS) is automatically set to overwrite the video following the 31 day period.

32. When it is necessary to retain images for longer than your routine retention period, are those images then subject to regular review?

Yes

No

33. Are there any time constraints in the event of a law enforcement agency not taking advantage of the opportunity to view the retained images?

Yes

No

34. Do you quarantine all relevant information and images relating to a reported incident until such time as the incident is resolved and/or all the information and images have been passed on to the enforcement agencies?

Yes

No

35. Have you identified any areas where action is required to conform more fully with the requirements of Principle 6?

Yes

No

Action Plan

Principle 7

Access to retained images and information should be restricted and there must be clearly defined rules on who can gain access and for what purpose such access is granted; the disclosure of images and information should only take place when it is necessary for such a purpose or for law enforcement purposes.

36. How do you decide who has access to the images and information retained by your surveillance camera system?

Access is agreed by permission of scheme owners for purposes of the scheme objectives, using the Code of Practice, CCTV Procedures, Policies and relevant laws as guidance. Members of the public are directed to the website and a Subject Access Request procedure.

37. Do you have a written policy on the disclosure of information to any third party?

Yes

No

38. How do your procedures for disclosure of information guard against cyber security risks?

All removeable media is encrypted to external partners, if moving internally a secure folder on a shared drive or secure email is used. Conwy CCTV also upload video footage to a secure platform for North Wales Police using Conwy Corporate Network who are accredited to Cyber Essential Standard.

39. What are your procedures for Subject Access Requests where a data subject asks for copies of any images in which they appear?

Data Subjects are directed to the Conwy CCTV Website where permission is granted on a case by case decision following the correct procedures.

40. Do your procedures include publication of information about how to make a Subject Access Request, and include privacy masking capability in the event that any third party is recognisable in the images which are released to your data subject?

Yes

No

41. What procedures do you have to document decisions about the sharing of information with a third party and what checks do you have in place to ensure that the disclosure policy is followed?

Conwy use a standard application form which is processed via Single Point of Contact and Senior Responsible Officer. All requests are also documented on our Management Information System (CMIS)

42. Have you identified any areas where action is required to conform more fully with the requirements of Principle 7?

Yes

No

Action Plan

Principle 8

Surveillance camera system operators should consider any approved operational, technical and competency standards relevant to a system and its purpose and work to meet and maintain those standards.

(There are lists of relevant standards on the Surveillance Camera Commissioner's website: <https://www.gov.uk/guidance/recommended-standards-for-the-cctv-industry>)

43. What approved operational, technical and competency standards relevant to a surveillance system and its purpose does your system meet?

British Standard setting out recommendations of the management and operation of CCTV systems BS7958.pdf
British Standard on conducting the security screening of individuals BS7858.pdf

44. How do you ensure that these standards are met from the moment of commissioning your system and maintained appropriately?

Standards are met to Surveillance Camera Code of Practice third Party Certification Scheme
Conwy CCTV are also an accredited NSI Gold ARC incorporating a quality management system with internal audit

45. Have you gained independent third-party certification against the approved standards?

Yes

No

46. Have you identified any areas where action is required to conform more fully with the requirements of Principle 8?

Yes

No

Action Plan

Principle 9

Surveillance camera system images and information should be subject to appropriate security measures to safeguard against unauthorised access and use.

47. What security safeguards exist to ensure the integrity of images and information?

Conwy CCTV uses a CCTV front end 'Fusion' which is password protected with various admin levels and integrated 'Fusion' incident database with full audit trail.
CCTV Operators are Non Police Personnel vetted Level 2 and SIA

48. If the system is connected across an organisational network or intranet, do sufficient controls and safeguards exist?

Yes

No

49. How do your security systems guard against cyber security threats?

Conwy CCTV use Corporate IT to provide the CCTV Network, they are accredited to Cyber Essential standard and perform all our pen tests and monitor the network.

50. What documented procedures, instructions and/or guidelines are in place regarding the storage, use and access of surveillance camera system images and information?

Conwy CCTV Code of Practice and CCTV Policy and Procedures, incorporating a Document Control Database.

51. In the event of a drone mounted camera being lost from sight, what capability does the pilot have to reformat the memory storage or protect against cyber attack by remote activation?

NA No Drones

52. In the event of a body worn camera being lost or stolen, what capability exists to ensure data cannot be viewed or exported by unauthorised persons?

NA No BWV

53. In reviewing your responses to Principle 9, have you identified any areas where action is required to conform more fully with the requirements? If so, please list them below.

Yes

No

Action Plan

Continue to development and review document control

Principle 10

There should be effective review and audit mechanisms to ensure legal requirements, policies and standards are complied with in practice, and regular reports should be published.

54. How do you review your system to ensure it remains necessary and proportionate in meeting its stated purpose?

Internal Audit Plan - within quality management system

55. Have you identified any camera locations or integrated surveillance technologies that do not remain justified in meeting the stated purpose(s)?

Yes

No

56. Have you conducted an evaluation in order to compare alternative interventions to surveillance cameras? (If so please provide brief details)

Yes

No

Annual Review and published Annual Report

57. How do your system maintenance arrangements ensure that it remains effective in meeting its stated purpose?

Full managed maintenance contracts for control room and camera end, tendered every 5 years with assistance from Procurement department

58. Have you identified any areas where action is required to conform more fully with the requirements of Principle 10?

Yes

No

Action Plan

Ensure Conwy Website is updated with latest documents

Principle 11

When the use of a surveillance camera system is in pursuit of a legitimate aim, and there is a pressing need for its use, it should then be used in the most effective way to support public safety and law enforcement with the aim of processing images and information of evidential value.

59. Are the images and information produced by your system of a suitable quality to meet requirements for use as evidence? Yes No

60. During the production of the operational requirement for your system, what stakeholder engagement was carried out or guidance followed to ensure exported data would meet the quality requirements for evidential purposes?

Full Conwy Wireless Digital Upgrade undertaken 2017 using cctv consultants for technical specification

61. Do you have safeguards in place to ensure the forensic integrity of the images and information, including a complete audit trail? Yes No

62. Is the information in a format that is easily exportable? Yes No

63. Does the storage ensure the integrity and quality of the original recording and of the meta-data? Yes No

64. Have you identified any areas where action is required to conform more fully with the requirements of Principle 11? Yes No

Action Plan

Principle 12

Any information used to support a surveillance camera system which compares against a reference database for matching purposes should be accurate and kept up to date.

65. What use do you make of integrated surveillance technology such as automatic number plate recognition or automatic facial recognition software?

No ANPR or Facial Recognition In Conwy Council

66. How do you decide when and whether a vehicle or individual should be included in a reference database?

NA

67. Do you have a policy in place to ensure that the information contained on your database is accurate and up to date?

Yes

No

68. What policies are in place to determine how long information remains in the reference database?

Conwy CCTV Code of Practice and Retention Policy

69. Are all staff aware of when surveillance becomes covert surveillance under the Regulation of Investigatory Powers Act (RIPA) 2000?

Yes

No

70. Have you identified any areas where action is required to conform more fully with the requirements of Principle 12?

Yes

No

Action Plan
