Preferred Strategy

Summary of Representations & Council's Initial Response

Section: Executive Summary

1.1

<i>Representation(s)</i>	<i>No of People</i>	<i>Nature</i>
27452 Mr Steven Carter [6346]	1	Object
<i>Total Number of People:</i> 1		
<i>Summary:</i>		
<p>Llanfairfechan will become less of a community and more a dormitory village where residents work, shop, use services and recreate elsewhere, also increasing congestion and pollution. The problems associated with lack of GPs (appointments), dentists (none), almost non-existent police (crime and vandalism) will increase at least proportionately. Moving the schools will further damage the little retail presence in the village's centre, and sense of community.</p> <p>Llanfairfechan is neglected with little/no investment to develop work, recreation (particularly for youth), tourism, community facilities.</p> <p>Awareness of the Plan is very low.</p>		
<i>Change to Plan:</i>		
<p>Additional housing should be proportional to the village's populations and reserved for long-term residents (10 years?) of Llanfairfechan. Conwy's additional housing should be close to work, retail and services to reduce traveling, rather than increase it. The Council should be investing in bringing work e.g. tourism to Llanfairfechan such as developing the beach, maintaining its footpaths and promoting as a gateway to the Carneddau with its numerous walks and archaeological monuments. Retail opportunities could be promoted e.g. the old Co-Op site. Council departments resited into the village instead of removed. The infants' school in the centre of the village contributes to the feel of a community and should be retained - anyone asked the parents what they want? Instead of taking money out of Llanfairfechan, and getting 400 more rates to spend elsewhere, the Council should be investing in the community of Llanfairfechan and its people.</p> <p>The plan should itemise for each section what is doing for Llanfairfechan and other communities: in, in most cases it is currently nothing, unless you live in Llandudno, Colwyn Bay and Conwy.</p> <p>The exhibition explaining the plan in Llanfairfechan should be rerun with greater advertising, and your website should better explain how to feedback on line</p>		
<i>Response:</i>		
<p>Not accepted: The planning system cannot restrict migration in to Llanfairfechan.</p> <p>The RLDP strategy seeks to locate the majority of residential sites in the urban areas, which are in close proximity to existing employment sites and other facilities.</p> <p>A new primary school has been agreed for Llanfairfechan due to the current schools not meeting 21st Century Schools Standards. Consultation with parents is part of this programme.</p> <p>The residential sites will be required to contribute financially for planning obligations. This will be secured for spend in Llanfairfechan.</p> <p>An additional event was held at Llanfairfechan due to the interest in the proposals. There will be another opportunity to comment on proposals at Deposit stage of the RLDP.</p>		

Section: *Overarching Strategic Approach*
2.3 *The Preferred Strategy*

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
27501	Ms Jayne Neal [6378]	1	Comment
<i>Total Number of People:</i> 1			
<i>Summary:</i>			
I am Town Clerk in Llanfairfechan and very keen to do everything I can to help any village development to be accepted and embraced by the residents.			
However, it should be remembered that the Town Council is on the front line with this issue and must be fully engaged within a working partnership with CCBC to ensure the correct message is disseminated. We need to feel that any plans are going to benefit the village and lead to positive economic growth and increased health and wellbeing.			
Current residents must not be marginalised in favour of encouraging new comers.			
<i>Change to Plan:</i>			
There is a distinct and pressing housing need within the village for existing residents and this should not be forgotten.			
<i>Response:</i>			
Noted			

Section: Overarching Strategic Approach

2.3 The Preferred Strategy

Representation(s)		No of People	Nature
27602	Ms Alison Roberts [6436]	1	Object
Total Number of People: 1			
Summary:	i am a resident of Llanfairfechan, I was born here and have lived here all my life, i chose to stay here as it is my birth town and my family ties. and for the the community feel and welsh language, which all my family are welsh speakers.		
Change to Plan:	I object regarding the 400 houses plan, i have lived here all my life and love the community feel of the town, , this will be lost and the language will disappear. i am a welsh speaker and hardly talk welsh to anyone i see in the village when i pop to the shops, this will become worse with 400 houses available for anyone to buy, if i wanted to live in a community were i did not know anyone i would move to the city.		
Response:	Noted. The number of dwellings to be delivered on the site has been reduced to 250 due to other capacity constraints. Welsh language is assessed as part of the Replacement LDP process and will ensure the RLDP minimises negative impacts on the Welsh Language and seeks to maximise opportunities to encourage the use of the Welsh Language.

28200	Natural Resources Wales (Planning Consultations) [5880]	1	Comment		
<hr/>					
<i>Total Number of People:</i>		1			
<i>Summary:</i>		Topic Paper 9: Renewable Energy			
		We note that within this paper reference is made to the Joint Flood Risk Protocol. The protocol was produced to address development proposals in the Coastal East area of the county which is subject to flood risk and has been in existence for a number of years. We note that CCBC propose to revise this document as part of the RLDP. The RLDP should consider the possible changes to TAN15 following consultation later this year, which is likely to change the current protocol.			
<hr/>					
<i>Change to Plan:</i>					
<hr/>					
<i>Response:</i>		Noted. CCBC will work with NRW on any change to the protocol.			
<hr/>

Comment

Total Number of People: 1

Summary: Topic Paper 9: Renewable Energy

Reference is made to climate change impacts on flood risk in this paper. Welsh Government advise that CL-03-16 - Climate change allowances for Planning purposes should be used. The guidance also contains details of when to use High++ allowances for peak river flow and mean sea level e.g. where developments that significantly change existing settlement patterns/developments that are very sensitive to flood risk are proposed.

Change to Plan:

Response: Accepted. Text will be amended to clarify the approach.

Section: Overarching Strategic Approach

2.5 Supporting Documents

Representation(s)		No of People	Nature
28198	Natural Resources Wales (Planning Consultations) [5880]	1	Comment
<hr/>			
Total Number of People:		1	
Summary:		Topic Paper 6 Natural Environment	
		Policy NTE/3 - Biodiversity	
		Again, "New development should aim to maintain, 'restore' conserve and where possible, enhance biodiversity through"	
		Whenever European Protected Species are present statements to include Current Conservation Status (CCS) and Favourable Conservation Status (FCS) of the species will should be required.	
		Again, no reference is made to invasive non-native species or biosecurity.	
Change to Plan:		CCBC will refuse proposals which would have a negative impact on a European Site, protected or priority species or habitat unless the impact is adequately mitigated, and appropriate remediation and enhancement measures are proposed and secured by planning conditions or obligations in respect of European protected species. This should additionally add reference to Imperative reasons for overriding public interest (IROPI) and compliance with all derogation criteria.	
<hr/>			
Response:		Noted. Text will be amended to clarify the approach.

<hr/>			
Total Number of People:		1	
Summary:		Background Paper 35 Flood Risk and Development Opportunities (July 2019)	
		The Background Paper only refers to one site (Gwellyn Avenue). Raising sites above the design flood event may be an acceptable form of mitigation (if no increases in flood risk (depths and extent) are shown elsewhere), however as part of this RLDP process the cumulative effects must be shown for site raising for other site allocations along this frontage/flood cell.	
Change to Plan:		Therefore, further modelling work will be required with manipulations of ground levels showing any mitigation measures. Increased risk elsewhere would be contrary to TAN15.	
Response:		Noted. Text will be amended to clarify the approach.

Comment

Total Number of People: 1

Summary: SA Objective 5 - Housing

Land use change needs to consider biodiversity and mechanisms should be considered that facilitate the long-term management of biodiversity with an emphasis on protecting and enhancement. Management may be required to facilitate the maintenance; creation, restoration or enhancement of habitat and their associated or component species.

Change to Plan: It is advocated that the approach based on conservation status in the Bonn Convention is used to inform identified aims and objectives. In effect this is based on Historic Conservation Status (HCS); Current Conservation Status (CCS); Favourable Conservation Status (FCS).

Response: **Noted. Text will be amended to clarify the approach in the RLDP.**

28184	Natural Resources Wales (Planning Consultations) [5880]	1	Comment
Total Number of People: 1			
Summary:			
Table A3.1 Review of Relevant Environmental Aspects, Issues and Problems			
Mineral extraction: in addition to referencing the potential to affect hydraulic pathways and landscape, consideration should also be given to the risk of potential land contamination and associated water quality.			
The North Wales Coalfield comprises the Flintshire Coalfield in the north and the Denbighshire Coalfield in the south. It extends from the Pont of Ayr through Wrexham to Oswestry, and there is also a small area on Anglesey. However, it does not fall into Conwy.			
Change to Plan:			
Reference to the North Wales Coalfield should be removed.			
Additionally, the statement that a dominant feature of the CCBC administrative area is the small valleys and associated uplands that form part of the former Wales Coalfields should be removed.			
Response:			
Accept in Part - Rephrase the Statement			
Table A3.1 forms part of Background Paper 04: SA/SEA Scoping Report August 2018, which is contained in the Generic Evidence Base which informs the preparation of the Preferred Strategy. On checking the BGS published National Resource Map of Wales for North East Wales, no part of the Carboniferous Coal Field occurs within Conwy. Within the National Park area the resources are predominantly igneous and metamorphic slates and elsewhere there is a patchwork of Peat, Sandstone, Alluvial, Glaciofluvial and Glacigenic sand and gravels. Recommend replacing the entire Baseline Key Characteristics entry for Natural Resources in Table A3.1 (8) with the following:			
"A dominant feature of Conwy CBC is the Silurian mudstone and slates which form the foothills and uplands of the Denbigh Moors in the east, the major valley system of the River Conwy and its tributaries in the central area, and the Silurian Mudstones and igneous rocks of the mountainous areas within Snowdonia to the west. A band of Carboniferous Limestone defines the higher ground along the coastal strip from Abergele to the Great Orme. A number of different mineral resources are illustrated on the National Resource Map for North East Wales, including Sand and Gravel and Hard Rock suitable for aggregates, and metalliferous and slate mining. Although mining activity in Conwy has ceased, many disused mines still exist and may affect hydraulic pathways below and on the surface, and may present sources of contamination which can adversely affect land and water quality. Furthermore, some disused mines may have a detrimental effect on the landscape and visual amenity."

Total Number of People:		1	
Summary:		Background Paper 35 Flood Risk and Development Opportunities (July 2019) The report concludes with 10 bullet points which would seem reasonable and in line with the content of the report and the minimum requirements as indicated in TAN15. We would however advise that although ground raising may be a form of flood mitigation, impacts elsewhere will need to be considered and where site allocations are in close proximity/same flood cells, then the cumulative impacts may provide further detriment than raising of individual sites; this would need further modelling/assessment.	
Change to Plan:		The final bullet point would seem to be missing the word "improvements" (defence improvements along the coastal frontage and tidal Clwyd will result in significant betterment, making several thousand properties safe from flooding that are currently within the flood extent.)	
Response:		Noted.

Bonn Convention

We welcome the statement "The SA Framework must include objectives relating to the appropriate conservation, protection and enhancement of designated sites." The text provides a clear reference to the Bonn Convention. The Bonn Convention includes the concept of Favourable Conservation Status.

Change to Plan:

It is advocated that CCBC adopt this concept as per the Bonn Convention. This requires consideration of historic, current and favourable conservation status. The application of this concept by CCBC will inform and underpin biodiversity actions.

Response:

Noted.

Summary:

Implications for SA again add the following highlighted text:

The Framework should include appropriate objectives to assess potential effects on habitats and species from proposals (including cumulative development) and policies within the emerging RLDP. This should include consideration of impacts such as habitat loss, recreational impacts, water abstraction, pollution, "biosecurity and invasive non-native species" and disturbance effects

Change to Plan:

Add the additional text.

Response:

Noted. Text will be amended to clarify in the RLDP.

Summary: Sustainability Appraisal			
Table A3.1 Review of Relevant Environmental Aspects, Issues and Problems			
1. Biodiversity, Fauna and Flora			
Under Existing objectives, Issues and problems, please add the following highlighted text:			
Change to Plan: Any proposals for development within the CCBC area could adversely impact designated sites and biodiversity through a range of direct and indirect effects, potentially including loss of roosting, foraging and other habitats, physical or noise disturbance, abstraction of river water, discharge of effluent, "invasive non-native species/biosecurity," contamination and air pollution. As such, all proposals and policies within the emerging RLDP arising from the LDP Review must take account of relevant ecological sensitivities. This includes the need to support the management of all designated sites in relation to their status and in pursuit of their defined conservation objectives. The RLDP must also provide an appropriate level of protection for protected species and non-designated ecological interests "and the management of such sites."			
Response: Noted. Text will be amended to clarify in the RLDP.

Total Number of People: 1			
Summary: BP01: Growth Level Options Report The Development Plans Manual states "The critical point is ensuring that both economic and housing growth are broadly aligned, accepting that there is no direct mathematical relationship. Both forecasts and the scale of growth should be aligned to support each other". The scale of growth proposed by the Preferred Strategy, far from supporting the Councils approach to the economy, appears likely to constrain such growth and increase pressure for unsustainable in-commuting contrary to the wording above. Housing Mix - we do not agree that the mix of market housing on a site might be controlled.			
Change to Plan: The growth levels should be more aspirational to support the Councils approach to the economy. Housing Mix of market housing should not be controlled.			
Response: Not accepted - the housing growth figure takes into account the increase in jobs - see Background Paper 1

28045	Ysgol Bryn Eliau (Mr Dave Humphreys) [6703]	1	Comment
<i>Total Number of People:</i> 1			
<i>Summary:</i>			
What BP 45 fails to identify is the fact that Ysgol Bryn Eliau is oversubscribed because of parental choice. 267 pupils who attend the school are out of its traditional catchment area as parents have exercised their right to choose a Secondary school for their child.			
The school would not be oversubscribed, in fact, not full if only pupils from the catchment area attended.			
This has a major bearing on section 6 of the council document, section 6.2. Ysgol Bryn Eliau would have capacity to accommodate pupils over time to accept all pupils in its catchment area.			
<i>Change to Plan:</i>			
We would object to pupils in our catchment area being sent to another local school by changing the catchment area. If pupils from our catchment area choose to go to another school, then that should be down to parental choice and not a change in catchment.			
<i>Response:</i>			
Noted. School capacity and catchment areas policies fall outside of the remit of the Replacement LDP. BP45 was written in consultation with CCBC Education Services. Planning Officers have worked and will continue to work with CCBC Education Services to assess the impact of new residential developments on school capacity, and financial contributions will be sought where justified.

Summary:

BP07 Housing Land Supply

The HBF considers that CAT4 sites should not be included in the commitments calculation.

The housing trajectory does not take account of committed sites. The council do not reduce the level of windfalls due to changes in funding for RSLs.

The commitments should be discounted to take account of the recognised likelihood of non-delivery from allocated sites.

The non-delivery of Council owned allocated sites needs to be considered when looking at allocations in the future.

Change to Plan:

Response:

Accepted in part. The Deposit Plan will include a full housing trajectory as per the tables in the draft LDP Manual (Edition 3). This will use the WG methodology and should address some of the issues raised here.

Total Number of People: 1			
Summary: Sustainable Placemaking in Conwy.			
The main objectives of the RLDP are, in general, supported. However, how the Preferred Strategy "trickles down" to the specific policy areas is not clear in some circumstances.			
There are parts of the RLDP which are inconsistent with the Preferred Strategy and accompanying policies, for example, in relation to Tier 2 Villages and housing allocations.			
Change to Plan: Proposed allocation 142 and 123 should not be included in the RLDP.			
Response: Not accepted. The Preferred Strategy does not include any allocations in Llysfaen. A number of candidate sites have been submitted for consideration in the village however, but these will not be allocated for development in the RLDP if the settlement hierarchy remains as it is in the PS.			

Section: Overarching Strategic Approach

2.17 Section 2: Vision and Objectives

Representation(s)		No of People	Nature
27495	Ms Jayne Neal [6378]	1	Object
Total Number of People:		1	
Summary:		I take issue with the document already quoting a proposed 400 houses in Llanfairfechan. This has only led to panic and concern amongst residents and is not a positive way to introduce the need for house building in the area. Facebook is now packed with negative comments and moral panic about the effect on the village.	
		The vision states there will be an 'increased range of well-designed accommodation will be provided across Conwy, based on the local need for affordable and open market housing.'	
Change to Plan:		For the sake of community cohesion, it is imperative that effective consultation takes place and that residents views are taken into account AND ACTED UPON! There is a general belief that this is all a done deal and that consultation results will not be taken seriously.	
Response:		Not accepted. Public consultation has taken place in-line with the Delivery Agreement and Welsh Government requirements. The next stages of producing the Replacement LDP will include further public consultation. All comments are considered and responded to by CCBC Planning Policy Officers. All comments received will be assessed to determine whether in 'planning terms' they represent a potential change to the RLDP. No comments are overlooked, but their assessment will be based on the underlying planning issues raised.

2.19 LDP Objectives

Representation(s)		No of People	Nature
28231	Mostyn Estates Limited (Mr Edward Hiller) [5167]	1	Comment
Total Number of People:		1	
Summary:		S02, S08	
		The effect of short-term holiday lets needs to be appropriately considered within the LDP, as the effect on neighbourhoods and the wider area can be profound.	
		The proliferation of short-term holiday lets raises a number of significant issues. It reduces the stock available in the private tented sector as short term holiday lettings can be more lucrative. It also places regulated holiday accommodation such as hotels and B&Bs at an unfair advantage.	
Change to Plan:		The LDP should consider how to best protect the interests of residents, businesses and tourists whilst also adapting to changing consumer tastes and demands. There are significant negative externalities associated with short-terms holiday lets, and consideration must be given to: The number of nights a property can be rented out for Licensing requirements Tax requirements How rules are enforced The effect on the holiday accommodation zone The impact on private sector rents The effect on local employment tourism sector	
Response:		Noted. BP/21 - 'Conwy Holiday Accommodation Study' seeks to identify the holiday accommodation types and levels throughout Conwy. However, some forms of holiday let are presently outside the planning process.

Summary: Flood risk is a significant issue for CCBC and the RLDP and there is no strategic objective (SO) below the vision itself to tackle this issue at the strategic planning scale. Ideally the SO objectives should form a smaller set of objectives. The revision or addition of an SO within the RLDP will require the refinement of the wording in the SA objective. There is an absence of local flood risk evidence within the baseline.

Change to Plan: Once the evidence base and SA/SO revisions have been completed, this SA should help to reassess impacts of flood risk within Appendix D and E and update overall indicators and conclusions of the PS and proposed growth options.

Response: Noted: This will be covered in the RLDP.

27651	Welsh Government (Mr Mark Newey) [2176]	1	Comment
Total Number of People: 1			
Summary:			The Council has undertaken a significant amount of work in respect of place making, delivery and infrastructure to inform the Preferred Strategy. This puts the LPA in a good position moving forward, namely: Clear articulation and justification of the spatial distribution of housing supply and components of the housing provision (private and affordable) Housing trajectory Strategic sites and delivery infrastructure assessment - including constraints, site requirements and masterplan concept frameworks Initial affordable housing viability paper Education and transport assessments and requirements
Change to Plan:			LDP Manual (Edition 3) sets out the key issues that must be addressed (in Chapter 5) and the authority should ensure all relevant aspects are covered in the Deposit plan, with particular attention on the de-risking checklist. In particular the Deposit plan should: Evidence the delivery of all allocated sites including a detailed articulation of their timing, phasing, costs and infrastructure requirements including the preparation of Statements of Common Ground (SoCG) where necessary, to demonstrate delivery of the plan; Prepare a high level viability study to inform affordable housing targets, and site specific viability work for sites which are central to the delivery of the strategy. Prepare a detailed housing trajectory supported by an analysis and understanding of lead-in times, the relationship between sites, potential constraints, costs, infrastructure requirements, density and funding streams with robust assumptions on windfalls. Ensure any necessary infrastructure requirements can be funded taking into account pooling restrictions on S106 agreements, Ensure the plan contains strategic site specific policies, supported by masterplan concept frameworks and infrastructure requirements. Prepare an infrastructure plan and include a delivery and infrastructure appendix
Response:			Noted. All necessary site viability, delivery and trajectory work will be prepared to inform the Deposit Plan.

Comment

Total Number of People: 1

Summary: The level of growth proposed is around 2,500 dwellings above the WG 2014-based principal and 10 year migration projection. The Council has concluded that the WG projections would result in 'too low' growth levels and would compound negative demographic and economic prospects for the LPA. The level of housing growth proposed in the Preferred Strategy broadly aligns with the past 15 year build rate trend (300 p/a) and is slightly above the past 10 year past build rates (250 p/a). The housing requirement is 2,200 dwellings lower than the current adopted plan required of 6,520 dwellings.

Change to Plan: The LPA will need to demonstrate the level of growth can be delivered and issues surrounding the Welsh Language have been robustly taken into account.

Response: **Noted.**

Comment

Total Number of People: 1

Summary:

Whilst the Town Council agrees in principle with the overall level of growth being proposed across the County for housing and employment, greater emphasis needs to be placed on the use of brownfield sites and particularly bringing empty homes back into use.

As a general principle, any larger allocations of land for housing should follow allocations of employment land, to encourage mixed-age occupation and prevent the unintended creation of 'dormitories' for commuters or for people retiring to the area.

Change to Plan:

Response:

Noted.

Total Number of People:		1	
Summary:		The document quotes that the Conwy Local Housing Market Assessment suggests that the 35% of housing supply should accommodate 1 & 2 bed properties, 35% 3 bed properties and 30% for 4 & 5 bed properties. Have calculations been broken down for the individual settlements ie - do you know what is specifically needed in Llanfairfechan or are all plans based on Conwy as a whole?	
		If 4300 houses are needed across Conwy, these proposed plans will result in a full 10% of those houses being built in a village that currently houses only 3% of the population of Conwy.	
Change to Plan:			
Response:		Noted. The percentages quoted are for Conwy as a whole, although individual local circumstances can be taken into account on individual sites. It is proposed to reduce the size of the strategic site significantly.

Total Number of People: 1

Summary:

Would like to question:

1 - Area of employment land related to jobs i.e. 1 new ha of land supports 150 jobs. Is this including infrastructure (roads) and assuming one single storied building? very low density of jobs to land.

2 - 5150 homes suggests minimum 10,300 people. But only 1800 new jobs. So what is the correlation? Are the new homes therefore holiday homes.

Change to Plan:

Response:

1 - Noted. The 14 hectares of employment land is based on the Welsh Government's job to land ratio and is worked out on a 'gross external area' basis so this includes infrastructure such as roads and carparking.

2 - Noted: refer to the evidence in BP/1

Total Number of People: 1

Summary: The LHMA (Table 38) concludes there is an annual need of 200 affordable homes per annum required over the plan period (excluding supply). The required tenure split shows a predominate need for social rented homes (85%) to intermediate (15%). However, the conclusion following the table states the LPA 'does not agree' and intends to pursue a 50/50 tenure split.

Change to Plan: This is a significant deviation from the Council's own evidence and requires robust justification and explanation. The LPA is alerted that deviation from the LHMA to this degree is potentially high risk unless this can be robustly justified and explained by the LPA. Affordable housing targets should be based on robust and consistent assumptions to ensure they are viable, appropriate and deliver the type and tenure of homes required.

Response: Noted: However refer to BP/11 for justification to defer from the LHMA.

Total Number of People: 1

Summary:

I question whether the area has excellent road links, the A55 is increasingly unfit for purpose. The roads within Llanrhos do not lend themselves suitable for any large scale development. The rail links could, and need to be, greatly improved. Trains are crowded with poor and unreliable rolling stock. The bus service is expensive and often crowded, especially on the Llanrhos route. Green space which promotes a feeling of health and well being is quickly being eroded in the Llanrhos/Deganwy/Llandudno Junction area. Small parks provided in the RLDP do not replace this green space.

Change to Plan:

Improvements to the A55 must be made and improvements to the roads in Llanrhos if development is takes place.

Response:

Noted. Highway improvements resulting from impact from the site will be expected to be made by the developer.

Total Number of People: 1

Summary:

We note that para 2.50 refers to defence improvements and a hold the line (HTL) policy. The HTL would refer to the shoreline management plan policy option of maintaining the existing coastal defences (rather than improvements). We have not been party to any discussions regarding such improvement works, although we appreciate this may be at an early stage. We would advise that TAN15: Development and Flood Risk states ".... government resources for flood and coastal defence are directed at reducing risks for existing development and are not available to provide defences in anticipation of future development...".

Change to Plan:

We would welcome a discussion with Conwy County Borough Council (CCBC) officers to discuss the maintenance/improvements for the defences.

Response:

Noted. Text will be amended to clarify the approach in the RLDP.

Summary:

DEPRIVED EASTERN AREAS

In regards to the recent development plan we have been shown in APP, we need to look at the funding implications for redevelopment of the beach and the housing needs/restoration of the flats area? This has to go into the RLDP.

Change to Plan:

As above.

Response:

Noted. The Eastern Regeneration and Investment Area (ERIA) designation will seek to address such issues.

Agent: Gordon Kenyon (Kenyon & Company) (Mr Gordon Kenyon) [1188]

Total Number of People: 1

Summary:

The preferred strategy advises that the Pensarn, Towyn and Kinmel Bay areas are subject to flood defence improvements. However, the preferred strategy is entirely silent with regard to details of any flood improvement works whatsoever. It is considered quite remarkable that, whilst deprivation and decline in these areas is clearly acknowledged, no proposals whatsoever are detailed to improve flood defence measures and reduce flood risk over the forthcoming plan period.

Change to Plan:

The Authority's decision not to include our Clients land for residential development purposes should be reviewed immediately.

Response:

Not accepted. Allocations and development in flood risk areas will be assessed in line with national planning and NRW guidance.

2.59 Settlement Hierarchy

Representation(s)		No of People	Nature
27646	Welsh Government (Mr Mark Newey) [2176]	1	Object
Total Number of People:		1	
Summary:	The settlement hierarchy and plan policies make multiple references to the promotion of 'exception sites' to meet local needs outside of settlement boundaries, providing they include a minimum of 50% affordable housing, on sites up to 20 units.		
Change to Plan:	PPW paragraph 4.2.34 is clear that exception sites are not appropriate for market housing. In line with Minister's recent letter where affordable housing allocations of a minimum of 50% are supported, particularly on public land, the Council should consider allocating these sites within the plan and its settlement boundaries to provide certainty and align with national policy requirements.		
Response:	Accepted in part. The 50% AH sites are not referred to in the PS as 'Exception Sites' however comments from the WG are noted and the AH policy will be revised for the Deposit Plan.

Total Number of People: 1

Summary:

In relation to the "Settlement Hierarchy":

Para 3.5.1- The placing of Llysfaen in the Tier 2 Category is supported.

However, there are inconsistencies apparent, namely:

Para 2.63 -This para states that "Land will not be allocated for new development in Tier 2 Villages." However, in the existing proposals, and contrary to para 2-63, six sites appear to be allocated to Tier 2 Llysfaen.

Change to Plan:

Proposed allocation 142 and 123 should not be included in the RLDP.

Response:

Not accepted. The Preferred Strategy does not include any allocations in Llysfaen. A number of candidate sites have been submitted for consideration in the village however, but these will not be allocated for development in the RLDP if the settlement hierarchy remains as it is in the PS.

Representation(s)		No of People	Nature
27498	Ms Jayne Neal [6378]	1	Comment
Total Number of People:		1	
Summary:		The documents states that all aspects of the strategic policies must be taken into account within these proposed housing developments. A lot of partnership work with the Town Council and residents must take place to ensure that developments in the village meet all these requirements.	
Change to Plan:		I believe that green technology and sustainability should be the primary consideration in any housing developments for the future. I know this is in the document but I want to be assured that building work will not be compromised by considerations about price. It is very likely that the cheapest contractors will not provide right sort of housing and infrastructure and plans should not go ahead unless all the policies have been contracted as part of a legal agreement.	
Response:		Noted. Sustainable development is a key strategic policy of the RLDP.

Comment

Total Number of People: 1

Summary:

The policies all sound excellent, however, no indication is given of levels of priority or enforcement. Many contradictory actions seem to occur within a guideline of sustainability/green infrastructure i.e. mature trees felled for road widening/building not replanted.

Road repairs - large vehicles used to lead single lane traffic, why not electric bicycles or hybrids?

Large build up of waiting vehicles at recycling centres, no apparent use of reclaimed building materials i.e. cut/faced stone.

Why no depot for mature tree butts to facilitate planking rather than ringing for firewood?

Change to Plan:

Response:

Noted.

1

Comment

Total Number of People: 1

Summary:

The strategy relating to town centre uses appear to recognise the issues facing town centres. However, policies designed to encourage alternative uses should be both appropriate and measured. Whilst leisure, entertainment and food and drink uses can benefit town centres, too greater concentration of a single alternative use can cause consequential damage.

Variety is a key element of any destination, though short-term economics might emphasise otherwise.

Hot and cold take away should be carefully controlled.

Total Number of People: 1

Summary: Delivery of economic well being means what? Creating prosperity for whom? What Conwy needs is work, work, work, for our young people to remain in the area? What exactly do you mean by sustainable development? The river Gele has "topped" twice this year and yet there is an obvious push for more housing in an area highly likely to flood (Kinmel Bay). Concentration on supporting viable businesses into Tir Llwyd should be paramount rather than entertainment facilities that some council member are considering which would be seasonal employment rather than full time.

Change to Plan: Consideration of public facilities which are already overloaded as well as flood risk to Kinmel Bay by either the seafront, River gele and even more hazardous the river clwyd need to be examined prior to any further "sustainable" placemaking in the area.

Response: **Not accepted. Areas of flood risk will be avoided and assessed in accordance with national guidance.**

Total Number of People: 1

Summary: So by not omitting any planning that does not conform all of the proposed outcomes is a "welcome to anything" approach? Very worrying for people living in a flood plain!

Change to Plan: Referring to Kinnel Bay only. It is quite clear that CCC are proposing to shore up parts of the sea front to in the main protect holiday homes and Caravan site (and so they should) but what about the people who have homes near to greater hazards? Namely the River Gele (topped) twice so far this year (high risk) and the Clwyd River Bank which was at collapse point in 1990. If CCC can get support from the WAG to do some of this work this work should not take place until the back door is closed and firmly protects the majority of residents in Kinnel bay. CCC have a duty to protect us even if that means liaising with NRW to obtain funds to shore this river bank up. Also it appears that councillors are pushing for "Flood resilient homes" in Kinnel Bay to be built--now that will impact on the prices of existing homes and negates the real issue of real flooding especially in the areas of Gwellyn Avenue and Denbigh circle as well as St Asaph avenue which did also flood in 1990. Should resilient homes be considered then financial compensation to existing home owners (adopted areas) should be given to secure their investments in Kinnel bay, There should be no new build within 150m either side of the river Gele and no more in our area putting us at greater risk.

Response: Not accepted. Areas of flood risk will be avoided and assessed in accordance with national guidance. Flood defences are managed by NRW.

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
27995	Home Builders Federation Ltd (Mr Mark Harris) [6080]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>			
The HBF considers that the proposed level of growth is not aspirational enough and although based on an economic led strategy, it is not one which takes full account of the potential of the area and the wider aspirations of North Wales.			
The preferred growth option in terms of economic growth relies on the allocation of between 12-14 ha of employment land whereas the findings of BP18 recommended employment land requirement range is 12-21 ha. The Council would appear to have chosen the lowest level of land provision resulting in a low level of jobs created.			
<i>Change to Plan:</i>			
The level of growth should be more aspirational.			
<i>Response:</i>			
Not Accepted: The Preferred Strategy matches the amount of jobs growth to the number of new dwellings needed, taking into population projections and need for affordable housing. This equates to 4300 dwellings (excluding contingency) and 1800 new jobs as identified the Employment Land Review Background Paper.			

Representation(s)		No of People	Nature
27522	Mr Gerald Jones [6389]	1	Comment
<hr/>			
Total Number of People:		1	
Summary:		It seems that the proposed housing numbers do not match with the numbers of working people or the possibility of work so the area could become a retirement zone where all those of working age will need to move out of Conwy to find work? If people can afford second homes then they should pay a premium council tax which should mean a reduction in tax on locals. Your quote about age structure is nonsense

27789	Mr Myrddin Davies [6549] <i>Agent: Owen Devenport Ltd (Mr Jamie Bradshaw) [3754]</i>	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>			
The strategic allocation in Llanrwst is too large. It would result in considerable landscape impacts and risks the delivery of housing for the settlement and rural development area by placing the majority of housing growth on a single site.			
The site is also somewhat isolated from the town centre, and the development of a single site of this size would have a substantial impact upon the community.			
<i>Change to Plan:</i>			
It would be preferable to allocate 2 or 3 smaller sites as this would reduce the impact and risk. In this respect our client sites are ideally suited to meeting that requirement.			
<i>Response:</i>			
Not accepted. Development land in & around Llanrwst is severely constrained due to topography, flood risk, utilities & highways which have to date prevented the development of current allocations. There is a need to identify more deliverable allocation(s) in the RLDP.

27629	Miss Anna Williams [6362]	1	Object
Total Number of People: 1			
Summary: I have concerns about the size of the proposed build in Llanfairfechan. 400 houses will be a lot of extra traffic and a strain on resources in a already busy area. Very few will be able to afford a £180,000 houses without considerable further debt. Currently on the market in Llanfairfechan there are a few first time buyer homes around £125,000 and under and a lot over £195,000 . However no suitable family homes in between. I propose that less houses are built and what is built is affordable for the average working household income in Llanfairfechan.			
Change to Plan: I object to the amount of homes proposed and would like this to be reduced by 50% or more.			
Response: Noted: Additional constraints have been identified for the site, which means that the number of dwellings proposed has reduced to approx 250. Developers normally provide a mix of house types on their sites. The site will also include provision for affordable housing.			

Representation(s)		No of People	Nature
27603	Ms Alison Roberts [6436]	1	Object

Summary:

Roads in the Llanrhos area would need to be vastly improved if the major developments are to take place. I live in St Anne's Gardens and the junction with the main road is already dangerous due to the bend and speeding traffic. Traffic calming measures would be required. The new housing developments in the area will lead to more strain being placed on the traffic flow in and out of Llandudno. I think it is a vain hope that time poor parents will cycle with their children to a school using a busy, hilly and narrow road.

Change to Plan:

Summary:

A Primary School and 250 houses resulting in vehicular access/es onto Bryn Lupus Road would generate increased traffic, resulting in severe road safety issues.

It would add to increased flooding issues to this area, and concern over whether public drainage systems would be able to cope, my property, one of the immediate neighbours of the site, already floods during heavy rain.

There would be an impact on the landscape, an overbearing presence and detriment to the residents of properties backing onto the site, (Maes y Castell) many of them elderly.

Concern would also be for the wildlife in the area.

Change to Plan:

I feel that the proposed school and a large number of houses should not be located in Llanrhos.

Response:

Not accepted. Statutory consultee comments will be provided to inform the suitability of sites. Biodiversity enhancement will be expected on all sites.

Summary:

The identification of flood risk areas seems alarmingly uncaring. It appears that County councillors who have the ears of Conwy Council continue to make light of the pretty hazardous/high risk that many long term residents of Kinmel Bay are concerned with. Once again the push for developments off the St Asaph Avenue areas is of great concern as landowners (who live out of the area) have total disregard for the health and safety and welfare of existing residents as outlined by NRW. Council and WAG must assure us of safety and financial support should any further development be approved

Change to Plan:

Once again the development "push" by councillors and land owners gives scant regard to existing homeowners and putting it bluntly don't care. Even thinking about development in Kinmel Bay should be immediately stopped until both Rivers are regarded as no risk. Currently high risk--ask NRW and/or Home Insurance companies--many of whom will not cover flood insurance.

Response:

Not accepted. There will be no allocations within flood risk zones as advised by NRW and national planning guidance.

Summary:

- a) I do not dispute the retail hierarchy for centres.
b) The Conwy Retail Study appears to be quite at odds to what is visible on the ground. To the West the plan highlights any latent needs will be satisfied by the Lidl scheme. The plan suggests that this replaces the lapsed consent on the Brickworks site, however that was for 100k sq ft. Does this imply that assessments have been revised?
The majority of policies within the plan are protective of change within town centres, yet not from detrimental effects outside those urban settlements.

Change to Plan:

Response:

- (a) noted.
(b) The Conwy Retail Study was revised as part of the updated evidence base for the Replacement LDP. The retail need for the plan area was similar to previous, but it has now been split for different parts of the coast, to provide more flexibility with store sizes and better reflect the changing needs of the retail market.

<hr/>			
<i>Total Number of People:</i>		1	
<i>Summary:</i>	This section concentrates on designated sites which are already protected by law. The contribution to place, education and culture made by undesignated archaeology (much of which is buried with no direct economic value) should be acknowledged in the text with a commitment to have due regard to this resource in decision making.		
<i>Change to Plan:</i>	New paragraph - 5.4.14 Scheduled ancient monuments form only a small proportion of the total number of archaeological and historic sites. When considering proposals on unscheduled archaeological sites, the Council will consult with the Clwyd-Powys/Gwynedd Archaeological Trusts, and take into account the interest and importance of the sites and their settings. Where necessary the Council will require that sites are properly assessed and evaluated before deciding on whether to grant planning permission. Planning permission will be refused if the archaeological site is of sufficient interest to merit protection from disturbance altogether. Preservation and recording of sites may also be secured through the use of planning conditions and agreements. An SPG will be produced to guide development proposals on these matters.		
<i>Response:</i>	Accepted will include this new paragraph in the Deposit plan

Comment

Total Number of People: 1

Summary:

I represent the Marine Terrace & Llanrhos Road Residents Association which is a recognised group. My comment is in reference to Site 73 (Winllan Farm field) in the candidates register. As far as I am aware this field is still classified as a Green Wedge area and should be protected as such. Many attempts have been made to build on this site and the last time was refused by the Welsh Office inspector because it would affect the coalescence between Penrhyn Bay and Glanwyddan. Nothing has changed in this respect. Please protect our precious green fields.

Change to Plan:

Response:

Noted. However the site has been submitted again and will be assessed again. The LDP process allows opportunity to review the Green Wedge designations.

Total Number of People: 1

Summary:

Although the draft plan makes passing reference to the importance of trees and hedgerows to encouraging biodiversity no reference to the need to control the increasingly widespread problems associated with the netting of trees and hedgerows is included. This practice is predominately used by developers and others to prevent birds nesting in both trees and hedgerows often prior to any planning permission being sought or granted. The RSPCA are calling on all council's to introduce policy guidelines that ensure development is not carried out during nesting periods and that the use of netting is banned or strictly controlled.

Change to Plan:

The inclusion of clear policy guidelines over the strict control of netting of trees and hedgerows. There being a clear assumption that such practices will be firmly resisted unless there is unequivocal evidence that such measures will not in any way adversely impact on the area's biodiversity

Response:

Noted. This will be covered in the LDP policy and SPG. It did not form part of the PS as was not considered a strategic issue, and ultimately a legal issue.

Strategic Policy SP/26: Flooding

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
28225	CCBC (Cllr Geoff Corry) [6800]	1	Comment
Total Number of People: 1			
Summary:			
The River Gele has more recently shown level rises which appear to be above the norm, there have been recent flood warnings particularly for the River Gele and the River has overtopped this year, west of St Asaph Avenue.			
In general , in relation to global sea rises and Flood defences reviewed there has been more concentration on the Kinmel Bay sea front promenade and the river Clwyd West Bank.			
The LDP should not be restrictive by referencing or offering priority ring fencing to any particular site, however, maintain total flexibility as stated.			
Change to Plan:			
Should there be a change to the current planning restrictions referenced to flood plain, either by flood defence work or other reasoning then probability may well prove that potential land, other than the noted brownfield locations, within the Kinmel Bay community boundary may well become available as suitable housing sites as prior to the planning restrictions currently in place.			
Subject to the River Gele not receiving improved flood defence improvements at any time or planning restrictions as a whole on the flood plain being lifted then in the interest of safety perhaps consideration may well be practical to place a more restrictive planning no build exclusion zone either side of the river Gele for its length.			
Response:			
Noted. Areas of flood risk will be avoided in line with national guidance.

Noted. Text will be amended to clarify

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
27652	Welsh Government (Mr Mark Newey) [2176]	1	Comment
Total Number of People: 1			
Summary:	A large proportion of the authority is within Priority Areas 3 & 15 for Solar and Wind Energy in the draft NDF. On this basis the Authority should ensure that it is in general conformity with the NDF when adopted. The LPA has prepared a Renewable Energy Assessment (REA) in line with the WG Toolkit Methodology which concludes there are no suitable wind or solar Local Search Areas (LSAs). The Council has allocated the SSA within its area, and is proposing to allocate Land at Gofer for a 4MW PV solar array.		
Change to Plan:	The Deposit plan should: Demonstrate how the REA has been embedded into the candidate site process and explain how renewable energy and low carbon opportunities have informed the scale and location of growth; Include in policy and as part of the monitoring framework the contribution of the plan area towards developing and facilitating renewable and low carbon energy, and Include in the policy framework opportunities for local renewable and low carbon energy generation schemes.		
Response:	Noted. The NDF detail wasn't available at the time of preparing the Preferred Strategy and the identified areas are not available as data as WG cannot release it in draft form. Text and designations will be amended to reflect national guidance when finalised and clarity will be added regarding the integration of the REA recommendations.

Total Number of People: 1

Summary: Paragraph 6.7.31 is clearly a decision for Welsh Ministers and we would question the appropriateness of referring to the tidal lagoon as Colwyn Bay Tidal Lagoon when it is likely to extend beyond Colwyn Bay, and into Denbighshire County Council (DCC). Perhaps the term "North Wales Tidal Lagoon" might be more appropriate. Given that there are no proposals for a North Wales Tidal Lagoon, we think it is premature to include it in an LDP which should be based on deliverability over the lifetime of the plan.

Change to Plan: As DCC's LDP is at a similar stage, and we have made no mention of the "North Wales Tidal Lagoon" based on the lack of any such proposal and the significant issues over deliverability, we think for consistency CCBC should consider a similar approach.

Response: **Noted.**

Summary: The development of a tidal lagoon will bring not only environmental benefits but has the potential to deliver employment and wider regeneration benefits to the coastal communities of Colwyn Bay, Pensarn Kinmel Bay and Towyn. It also offers the potential for involvement of the local community in its planning and longer term management.

Change to Plan:

Response: **Noted.**

<i>Total Number of People:</i> 1			
<i>Summary:</i>	Strategic Policy 33 e) Paragraph 5.14.7 of PPW addresses the Safeguarding of Mineral Resources and Infrastructure. As proposed the wording of this section of the policy does not safeguard the infrastructure associated with minerals processing activities, storage transportation and added value facilities.		
<i>Change to Plan:</i>	Amend the text to read "e) Safeguarding sand & gravel and hard rock resources as identified on the proposals map and at existing permitted reserves of hard rock at..... and St George Quarries; together with the safeguarding of existing or planned wharves, railheads, associated processing facilities and batching plants"		
<i>Response:</i>	Accepted. Facilities which are intrinsic or ancillary to a given quarry such as processing and batching plant are already afforded protection by the quarry buffer-zone policy and by virtue that the surrounding mineral resource is safeguarded and identified on the proposals map and further differentiation is not required within minerals safeguarding layer on the proposals map. The suggested amendment will provide adequate policy protection without needing to identify every such facility. However, it is intended that because the wharf at Raynes Quarry and the rail loading terminal at Penmaenmawr Quarry are at remote locations from the main quarry, these will be identified on the proposals map.

Total Number of People: 1

Summary:

This paragraph states, "It is proposed to only safeguard deposits which exceed a defined threshold of size...."

There is no indication of the "size threshold" in the text. We would also question this approach as consideration must be given to area, quantity and quality of the mineral, together with other economic considerations.

Change to Plan:

Amend the text accordingly.

Response:

Accepted in part. The exercise to limit safeguarded sand and gravel resources to a pragmatic and proportionate scale used an iterative sieve mapping process to remove small and spatially intermittent deposits. This considered factors such as accessibility, remoteness, planning constraints, proximity to other allocations and tidal flood plains to remove deposits which are considered unlikely to be of economic or social value for the LDP period and beyond for future generations. The random and discontinuous nature of many of the smaller deposits, often being less than 100 metres in extent and thin in depth, are not known to be of high quality, and are interspersed with boulder clays and silt. The application of the requisite buffer zone around the outer edge of the deposit creates a disproportionately large safeguarding area which is exacerbated where several small 20 to 100 metre diameter deposits are located within 200 metres of each other which causes the buffer zones to merge, giving the false impression of a much wider and extensive deposit than is the case. In the absence of evidence to confirm that such deposits have a quality worthy of safeguarding, they are not included.

Summary:		It is understood that part of the site has suffered from surface water/pluvial flooding in the past. We understand that works to reduce flood risks on this site were carried out in 1990's. We have no in principle issue with regards to effects on the setting of Snowdonia National Park. However, a well-considered indicative masterplan for the site would be required to ensure the development fits within its landscape and settlement edge context. The landscape issues for consideration are: a) Conserving the setting of Snowdonia National Park. b) Development form and fit c) Conservation of natural/heritage features of the site	
Change to Plan:		We would advise that your Authority as the Lead Local Flood Authority will need to consider Surface water flooding in considering inclusion of the site. We would recommend that before Draft Deposit Stage you: Assess how development density, pattern and building heights can best fit the site within available views (including views from Snowdonia National Park); Allow sufficient space in the development for strategic tree planting along boundaries, within public open space and along streets to break up the urban form of the development; Plan adequate space for the field tree, root protection zones of woodland trees, place these areas within the public open space network to allow their co-ordinated management and remove conflict with private dwellings and gardens. The planning of SuDs within public open space will further influence the greenspace/ built form layout and planning for biodiversity.	
Response:		Noted.

Summary:	We understand we need new homes for people and a school but 400 houses are far too many for a village of approximately 3,650 people. It will affect the culture and the Welsh Language. There are countless empty buildings in the village that could be used. We have no infrastructure, the current roads etc. are struggling to cope. There is no employment so Llanfairfechan is likely to become a commuter town. Conwy Social Services, Betsi Cadwaladr Health service and North Wales Police is at breaking point.		
Change to Plan:	Remove the strategic site from the RLDP.		
Response:	Not accepted: The number of dwellings that the site is allocated for will be reduced to reflect additional constraints identified. GP Surgery and schools capacity will be mitigated as appropriate through the RLDP. Impact on Welsh language will be assessed as part of the Replacement LDP process and mitigation will be provided where required. An allowance for windfall dwellings coming forward on sites that cannot be allocated has been made in the dwelling requirements. This includes empty buildings.

Summary:	The scale of growth identified in the strategy is excessive and unjustified to meet the needs of Llanfairfechan. Such a development will significantly harm Llanfairfechan's character, biodiversity and landscape. The Preferred Strategy fails to demonstrate whether Llanfairfechan has or is capable of delivering the necessary infrastructure to support this development. There is no evidence of such a large housing need in Llanfairfechan. Instead greater emphasis should be placed on a lower level of growth that supports existing community infrastructure and natural local population change.		
Change to Plan:	Greater emphasis should be placed on a lower level of growth that supports existing community infrastructure and natural local population change.		
Response:	Not accepted. The site capacity has been reduced to 250 dwellings to reflect additional constraints that have been identified. This will only deliver part of the dwelling requirement in the Western part of the Replacement LDP area. Infrastructure requirements has been assessed and will be mitigated for if required. The need for new dwellings has been assessed and makes up part of the evidence base accompanying the Replacement LDP. Providing for natural change only would not deliver the Vision and Objectives of the Replacement LDP.

29206	Mr Lloyd Jones [4169]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	The town is already bursting at the seams. The health centre and pharmacy are already at full stretch. It is one of the most beautiful fields along the coast. It shines light into the village. It is the last green corridor along the coast. The plan for a school is just a lure. the developers will make a fat profit and the council will be quids in. What about the Welsh language and culture. The Council should do more to help with town's young people in other ways with converting empty buildings i.e. Health home/CoOp and the old butchers shop.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Not accepted. Land will be allocated if required to ensure that there is sufficient GP surgery capacity. The new primary school is part of the 21st Century Schools Programme. There will be a Welsh Language Impact Assessment as part of the Replacement LDP. The dwelling requirements for the Replacement LDP includes an element of windfall development, which covers any dwellings that could be delivered by empty buildings.

<i>Summary:</i>	I wish to comment on LDP plan and how it will affect Llanfairfechan. I object to the proposals in that the GP surgery is already struggling after the extra burden of Penmaenmawr patients and could not cope with extra influx. I feel that if houses have to be built they should be predominantly council i. e. social houses.		
<i>Change to Plan:</i>	I feel that if houses have to be built they should be predominantly council i. e. social houses.		
<i>Response:</i>	Not accepted. Land will be allocated if required to ensure that there is sufficient GP surgery capacity. An element of affordable housing will be provided on-site.		

Section: Appendix 4: Maps of Strategic Sites

10.1 Llanfairfechan

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
27451	Miss Nikki Lewis [6372]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	I object to the size of the proposed development in Llanfairfechan. For a small town 400 extra houses will have a negative impact as the infrastructure is not in place to deal with this number of extra residents but also it will change the social fabric of the town as a large proportion of the housing would be filled by people not from the immediate local area, such a large development is completely unnecessary in terms of the needs of local people.		
<i>Change to Plan:</i>	A much smaller housing development would be more appropriate for the size of Llanfairfechan, a maximum of 50 properties.		
<i>Response:</i>	Not accepted. The site capacity has been reduced to reflect additional constraints that have been identified. Any impact on infrastructure will be assessed and mitigated for where required.		

Section: Appendix 4: Maps of Strategic Sites

10.1 Llanfairfechan

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
27453	Ms Susan Ridgway [6374]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	I strongly oppose the plan to build on the proposed site and believe that Llanfairfechan is being expected to accept a disproportionate amount of growth compared to other parts of Conwy Borough.		
<i>Change to Plan:</i>	I firmly believe that this proposal will be detrimental to the village and hope the residents views will be taken into account and other parts of the Borough will be required to share equally in the building programme.		
<i>Response:</i>	Accepted in part. Sites will be allocated across the plan area. The West part of the plan area is estimated to accommodate 10% of the growth. The site capacity has been reduced to reflect additional constraints that have been identified. Other sites will be allocated across the County Borough. The West part of the County Borough is taking approx 10% of the identified growth. The strategic site at Llanfairfechan only takes a portion of this identified need. Additional sites and windfall will be required to deliver the remaining growth.		

Section: Appendix 4: Maps of Strategic Sites

10.1 Llanfairfechan

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
27460	Mrs Pat Griffiths [6379]	1	Object
Total Number of People: 1			
Summary:	There is not capacity in Doctor's surgery. Following the closure of Penmaenmawr surgery, the service is already overstretched. Pen surgery closed due to candidates not coming forward to apply for vacant positions for GP practice. Additional people migrating to Llanfairfechan would mean an even lower GP to patient ratio. The policy does not meet the need for affordable houses for locals more than the 20% is needed the other 80% will be too expensive to buy since their income levels are too low to secure the mortgage needed. Other land in the town should be considered.		
Change to Plan:	Changes: not to build in the green space proposed. Number of houses should be less , infrastructure is not in place to support such a development.Policy should consider the adverse effect that this would have on the existing service users of the doctor's surgery. Adverse effect on the Welsh language in the town has been ignored. Stage 4 of the process seems to have been missed - locals were not consulted or made aware of the proposals.		
Response:	Not accepted: we have been working with the local health board, who have identified a capacity concern with the GP Surgery, but they believe it can be overcome through an extension. Land for this will be allocated through the RLDP if necessary. It is up to the Health Board in discussion and consultation with local GPs to determine the format of provision and resolve any staffing issues. The 20% affordable housing is based on financial viability. Impact on the Welsh language is assessed as part of the RLDP process and mitigation will be sought where necessary. Stage 4 of the RLDP process (Pre-Deposit Participation) did take place and was open to consultation between 14 December 2018 and 25 January 2019.

<i>Total Number of People:</i> 1			
<i>Summary:</i>	Objection to proposed density of new housing development in Llanfairfechan and stipulations/suggestions related to any new housing developments. Would also further suggest that the normal guideline of 10% social housing be increased to 25% and that the new homes only be marketed as permanent housing i.e. not available as holiday homes.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Not accepted. The affordable housing provision on-site will be financially assessed for viability as part of the Replacement LDP process. The current adopted LDP has it at 20% for this area.

10.1 Llanfairfechan

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
29207	Mrs L Roberts [7707]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i> This is too many houses for the village, it would change the village into a commuter town. Also the proposed housing development would put additional pressure on existing resources. No consultation was made with the village people prior to putting this plan forward, as there are many large empty buildings in Llanfairfechan that should be refurbished rather than built new e.g. The Heath, The old co-operative shop etc. 200 homes would be more than enough.			
<i>Change to Plan:</i> Remove the strategic site from the RLDP.			
<i>Response:</i> Not accepted. The capacity of the site has been reduced to 250 dwellings following additional constraints being identified. The dwelling requirement has been split across the Replacement LDP plan area. The West is to provide 10% of growth. Public consultation has been in-line with the Delivery Agreement and requirements set out by Welsh Government. There will be further public consultation on the Replacement LDP in future. An allowance for windfall sites has been included in the dwelling figures for the Replacement LDP. This includes empty buildings.

10.1 Llanfairfechan

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
28262	Mr David Griffiths [7713]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	I know that we need housing (affordable) for young families and older people in the village but I think this development is far too big for the infrastructure. The village is struggling at the moment especially the doctors surgery.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Not accepted: we have been working with the local health board, who have identified a capacity concern with the GP Surgery, but they believe it can be overcome through an extension. Land for this will be allocated through the RLDP if necessary. It is up to the Health Board in discussion and consultation with local GPs to determine the format of provision and resolve any staffing issues. A new primary school will be built as part of the 21st Century Schools Project. No other capacity concerns have been reported as part of the consultation process.

Support

Agent: The Planning Consultancy (Mr Matt Gilbert) [764]

Total Number of People: 1

Summary: Support for the allocation of a Strategic Site at Llanfairfechan. However, due to site constraints, the identified area appears to be insufficient to accommodate the envisaged 400 dwellings, consideration should, therefore, be given to extending the development area onto adjacent land in order to achieve the suggested site capacity.

Change to Plan: Extend the development onto adjacent land in order to achieve the suggested site capacity.

Response: **Accepted in part: the number that the site is allocated for will be reduced to reflect the additional constraints identified. The site boundary will not be amended, as it is not needed to deliver the growth level set for the West area (10% of all growth). Other allocations, commitments and windfall will meet this level need.**

27664	mrs barbara holmes [6475]	1	Comment
<hr/>			
Total Number of People:		1	
Summary:		Concerns with increase of traffic along Bryn Lupus, which is frequently monitored for speeding,also the associated pollution, noise and congestion. Concerns on the loss of yet more greenfield area and the environmental impact this has on wildlife and ecology. The plan is unsympathetic in terms of housing type for Llanrhos as this area is predominantly bungalow housing. The LDP section 3.3 states "the Council will adjust to an ageing population in terms of housing type". The plan for 3/4 bedroom 2-storey homes will detract greatly from the identity and "village" feel of Llanrhos, particularly around the Maes y Castell area.	
Change to Plan:		<hr/>	
Response:		Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.

Comment

Total Number of People: 1

Summary:

Concern that Llanrhos will lose its village identity and will become a continuation of the Marl development and Deganwy area.

I was told at the consultation that 90% of the housing stock will be taken up by local people; why then is there a need for further offices/workshops? Has nobody seen the vast amount of existing empty office spaces in the Conwy Council area?

Concern that the green/picnic/park areas will not come to fruition as the developer will want to maximise profit and increase the number of houses.

Already that figure has varied from 200 to 250!

Change to Plan:

Response:

Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.

Section: Appendix 4: Maps of Strategic Sites

10.2 Llanrhos

Representation(s)

No of People

Nature

Total Number of People: 679

Summary:

The site falls totally within the extensive Green Wedge Protected Area designated in 1982, to maintain the separate identifies of Llanrhos, Deganwy and Llandudno.
The Green Wedge Review states that the area forms an important green countryside buffer of rural character.
A lack of medical services.
Council services and operations are already under pressure.
Increased traffic congestion.
Loss of agricultural land, habitat and wildlife corridors.
Prioritise brownfield sites.
Drainage and sewage disposal capacity issues.
Housing actual requirements as opposed lifestyle choices.
Use existing powers to make unoccupied properties available.
Is the current year on year construction realistic and achievable.

Change to Plan:

Remove the strategic site from the RLDP.

Response:

Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.

Total Number of People: 104

Summary:

The green wedge needs to be conserved in its entirety in order to maintain the separate urban identities of Deganwy, Llanrhos and Llandudno.
If BP29 were followed it would disqualify the site. It recommends "the area should remain largely intact as it is already relatively narrow between large urban areas with severe pressure for development.
The projected housing demand not justified in terms of actual population and economic growth.
Insufficient/unsuitable road and footpath infrastructure.
Medical services already stretched and in decline.
Compromise of the Maes Dollau caravan park business.
Misleading inconsistent site extent.
Misleading layout and amenity content.

Change to Plan:

Remove the strategic site from the RLDP.

Response:

Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.

Total Number of People: 288

Summary:

Would adversely affect the role of the green wedge in maintaining separation of the settlements.
 We believe that not all landowners have agreed to development of the site so there is doubt as to its deliverability.
 As far as we are aware there does not appear to have been full and adequate assessment of suitability of the site.
 No assessment of submitted candidate sites has been prepared/published.
 Insufficient pupils to support provision of a new primary school.
 Plans at the exhibition differed from those published in the preferred strategy.
 Detrimental impact upon the setting of Maes Dolau Caravan Park.

Change to Plan:

Remove the strategic site from the RLDP.

Response:

Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.

28149	Llandudno and Colwyn Bay History Society (Mr John Lawson-Reay) [4429]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	Llanrhos currently works as a community. The loss of this prime farming land would have a serious impact on the viability of the farm. The county has been almost completely de-industrialised, without jobs there will be no need for housing. For affordable housing read token rented social housing. Welsh Water will find it difficult to provide sewerage facilities. The existing primary school in Deganwy is over capacity. The only medical practice in Deganwy comprises 2 doctors with a 6,000 plus list. The site is within a Special Landscape Area, Historic Landscape and Green Wedge.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.

Summary:

Bryn Lupus Road is a busy road and any development would increase the volume of vehicles and air/noise pollution considerably.
We understand that the proposed development area is "protected".
There has been a lot of housing development in the Llandudno Junction area.
There are currently 30,000 empty dwellings in Wales.
Why do we need more office units when units in the local area remain empty.
If this is allowed to happen Llanrhos will just merge with Deganwy and Llandudno Junction.

Change to Plan:

Remove the site from the RLDP.

Response:

Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.

27820	Dr Kirsty Maclean [6593]	1	Object
<hr/>			
<i>Total Number of People:</i>		1	
<i>Summary:</i>		There is local concern about the scale of this strategic development , the site will impact on the picturesque and stunning local space that is the Vardre and Deganwy castle, The closure of the local Deganwy school would be a great shame in the light of the new primary school development proposal which would mean losing the current invaluable resources such as Deganwy playgroup , after school and holiday club , not to mention the land surrounding the school as additional housing and loss of green space . The amount of traffic will also increase greatly with this proposal	
<i>Change to Plan:</i>		Remove Llanrhos site from the LDP	
<i>Response:</i>		Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.	

Section: Appendix 4: Maps of Strategic Sites

10.2 Llanrhos

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
28077	Miss Kay Hawkins [6659]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	The development(s) will result in the loss of important green space, effectively joining Llandudno Junction, Llanrhos and Deganwy into one large conurbation. Being closely located to the A470/A55 it will encourage long-distance commuters and increased traffic volumes, noise and air pollution. Owing to its 'peripheral' location, the proposed school will also cause traffic congestion on local roads. Already overstretched local medical services will also be further pressured by development of 250 new properties. Environmentally, the existing drainage systems already struggles to cope with annual heavy rainfall and localised flooding is an issue on several of the fields earmarked for development.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.		

Section: Appendix 4: Maps of Strategic Sites

10.2 Llanrhos

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
27984	Mr Arthur Humphries [6682]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>			
Twice I was told that this was not a plan but a 'concept'. Why present a concept?			
Twice I was told that Highways Dept. would need to be consulted about whether or not this concept was feasible. Why hasn't Highways Dept been consulted prior to the presentation of this plan?			
What most beggars belief is that a Planning Department could present a concept putting a Primary School on Bryn Lupus Road near a bend. It then compounds the foolishness by having an entrance to the new proposed housing estate either side of the school thereby increasing the potential for accidents.			
<i>Change to Plan:</i>			
The presentation of such an ill considered, almost non concept which is so full of loop holes seems to be like a scandalous waste of rate payers money.			
To the cynically minded it may seem that this concept is cobbled together by Beech Developments for the sole benefit and development of Beech Developments.			
<i>Response:</i>			
Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.			

Section: Appendix 4: Maps of Strategic Sites

10.2 Llanrhos

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>

10.2 Llanrhos

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
28247	Mr & Mrs Philip & Vivien Yeomans [6809]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	Just wanted to voice our opinion and objections about the proposed land development around the green wedge in the Bryn lupus road area. We have had our holiday home based on Maes Dolau farm park now for a number of years along with my 87 year old father and love the peace and tranquillity of the park and surrounding area. What a shame it would be to build and once again take up more of our designated green wedge which is all the surrounding land around the caravan park.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.		

Section: Appendix 4: Maps of Strategic Sites

10.2 Llanrhos

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
29219	Mr Edward Thonger [569]	80	Object
<i>Total Number of People:</i> 80			
<i>Summary:</i>	The green wedge plays a vital role in keeping separate the settlements of Llanrhos and Deganwy. It keeps open the green corridor north and south, between Deganwy and Llandudno. It is an essential part of the open rural character of the area. It also protects the sensitive setting of Deganwy Castle, lying within special and historic landscape areas. The plan ignores restraints urged by Conwy's own consultant, who stresses the need for a substantial gap between settlements. Destruction of remaining green wedge - already targeted. Housing demand unproven. Traffic hazards. Lack of resources. A confusing plan.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Accepted in part. Site will be reduced to reflect the green wedge review recommendation for land between Llanrhos and Deganwy.		

Section: Appendix 4: Maps of Strategic Sites

10.2 Llanrhos

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
28017	CCBC (Cllr Samantha Cotton) [6690]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>			
It would disrupt and have an adverse effect on the historic landscapes and viewpoints between The Vardre, Bryniau Tower and Bodysgallen. The site would completely encircle the historic Deganwy castle site and I believe this is an important historic landscape and should be preserved against development. I also believe the preservation of the green wedge as a buffer zone between settlements and between distinct areas of housing should be maintained. The surgery is only open for 3 morning a week for limited hours. I am not yet persuaded that a new primary school is required.			
<i>Change to Plan:</i>			
I would like more information on the range of employment opportunities that are available currently as per the Population, Facilities and Services found in each Settlement report, which would merit supporting the allocation of land for business development within this proposed preferred strategy. Further information needs to be provided in support the inclusion of a new primary school in this proposal.			
<i>Response:</i>			
Noted. Information will be sent and further justification given in the deposit RLDP.

Nature

1

Object

Total Number of People: 1

Summary:

- * The Llanrhos site is the only one proposed in the RLDP which is based on Green Wedge land.
- * The proposed development threatens the identity of Llanrhos and it will become part of an urban conurbation - the largest in Conwy. Moving Deganwy school away from its catchment area will result in a significant increase in carbon footprint.
- * Conwy Education Department's figures show a falling school roll therefore no new school is needed.
- * The proposed Llanrhos development would be a significant threat to a local business which attracts tourism.
- * Alternative sites are available.

Change to Plan:

Remove the strategic site from the RLDP.

Response:

Not accepted. The site will be reduced in area to reflect the recommendation in the Green Wedge Review.

28309	Mr Camron King [6770]	1	Object
<i>Total Number of People:</i> 43			
<i>Summary:</i>	The proposed development suggests a population increase of over 1300. The roads are already congested, 450 houses will exacerbate this. There is very little parking in Old Colwyn. The proposed new road is very unsafe. Schools faced 4% budget cuts in 2018/19, local schools had to make teaching/support staff redundant. The surgery is struggling to meet the needs of the local community. The proposed site is outside of the settlement boundary and in open countryside. Building over 400 houses on open countryside with have a significant impact on local wildlife. Health Board and local surgery not consulted.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's approval. The Health Board have been consulted on these proposals.

27948	Cadnant Planning (Mr Rhys Davies BA (Hons) MRTPI) [131]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	We raise an objection to Strategic Site 3 in Old Colwyn. We consider that Candidate Site 162 would be a much more logical site to accommodate the housing needs of the settlement. Candidate Site 162 would form a logical extension to the built up form of the settlement which would be bounded naturally by an existing employment uses.		
<i>Change to Plan:</i>	Amend strategic site 3 (Old Colwyn).		
<i>Response:</i>	Not accepted. Site 162 is less sustainable in terms of proximity to local amenities and traffic impact on the five-ways roundabout. By comparison, strategic site 3 has better links to local amenities and bus services, presents an alternative opportunity for traffic flows east bound and consists of a rounding off/settlement extension rather than ribbon-type development.

Total Number of People: 1			
Summary:			
Whilst we accept the need for some new housing sites in the Bay of Colwyn area, we have concerns about the proposed strategic site in Old Colwyn:			
There are significant access and highways issues which need to be overcome to facilitate the allocation of a site of this scale.			
Though it is noted the developer(s) would be required to make a contribution towards the infrastructure, there is uncertainty and significant local concern about how these will be staffed/resourced.			
We would prefer to see housing development following employment growth.			
Greenfield sites should provide a substantial proportion of AHLN.			
Change to Plan:			
The Town Council's concerns need to be addressed.			
Response:			
Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's approval. Levels of Affordable housing will be dictated by a specific policy in the LDP which will be informed by the National Development Framework for Wales.

Summary:

The RLDP proposed a new surgery within the Old Colwyn development. It is not explained whether this is intended as a branch surgery for an existing practice or a new surgery. It is highly unlikely that a new surgery would be established by the Local Health Board, and there is no good reason to open a branch surgery within half a mile of our surgery, so neither of these would be workable options.

There are also practical considerations relating to access and parking at our surgery.

Change to Plan:

Remove the strategic site from the RLDP.

Response:

Noted. If a need is identified for additional primary care capacity in the area, the planning process can provide land to support this need where required. It is up to the Health Board in discussion and consultation with local GPs to determine the format of provision and resolve any staffing issues.

Summary:

My concerns are:

Lorries thunder along Llanelian Road, the traffic is already heavy and drivers exceed the speed limit. Concerns that the bridge over the river will collapse.

On football match days the parking for fans is non-existent.

Coed Coch Road already has that many parked cars that the bus can't get through.

This is an area of great natural beauty, to destroy that would be a shame.

Llanelian Road has already become much busier and the amount of traffic will increase to the point that a fatal incident will become unavoidable.

Change to Plan:

Remove the strategic site from the RLDP.

Response:

Noted. Traffic impact will be assessed via Transport Assessments

Section: Appendix 4: Maps of Strategic Sites

27680	Mr & Mrs M & S Owen [6494]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	The proposed development will increase traffic significantly. I am also concerned that Old Cowlyn could not cope with the influx of such a large number of people. The Cadwgan Surgery cannot cope with the needs now. The proposed development would have a significant impact on the natural beauty and wildlife in the surrounding area. The plan was rejected 10 years ago due to traffic issues and the development of open countryside. Will have a significant impact on property values.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's needs. The Health Board have been consulted on these proposals.

27754	Mr Alun Williams [6500]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	Our objections are That it would have a detrimental effect on the environment and wildlife of the area The building of 450 homes will add considerably to traffic and road congestion. According to what I was informed at the public meeting last week the building of this development will also change the settlement boundary. Added to this would be the increased pressure on our GP, dental, hospital and school services which are already at full stretch. There may be issues on the impact on drainage. Priority should be given to empty housing stock in the Colwyn Bay Area.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's approval. The Health Board have been consulted on these proposals. Any drainage issues will need to be resolved to the satisfaction of NRW and CCBC's Environment department. Housing officers are currently looking at bringing empty homes into use where they can, however there is still a need for additional housing which this allocation addresses.

Summary:

Peulwys Lane is the most unsuitable road to think of building a housing estate off.

Owing to its steepness, narrowness, length and tight corners.

A school backing on to the lane at the top end and 2nd school on Dolwen Road which Peulwys Lane leads onto and children on foot coming and going to Bryn Eliau school. Dolwen Road leads to the dangerous Marine roundabout.

The road through Old Colwyn is always busy especially when the Promenade is closed.

A much larger volume of traffic using our side roads and main road would not improve our quality of life.

Change to Plan:

Remove the strategic site from the RLDP.

Response:

Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers.

<i>Total Number of People:</i> 1			
<i>Summary:</i>			To develop this site would not be in the interests or wellbeing of local residents, it would result in the loss of valued agricultural land and open green space. This area already has plans for approximately 450 units, Ty Mawr, Plas Gwilym, adjacent 123 Peulwys Lane and Llysfaen Road. This would meet the needs for the next 15 years. The Ty Mawr site if developed responsibly would provide the much needed affordable houses for local people. The infrastructure is not coping now, another 450 in the same area just does not make sense, even if they were needed.
<i>Change to Plan:</i>			Remove the strategic site from the RLDP.
<i>Response:</i>			Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, Agricultural Land Assessments, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's approval. In terms of the other sites referred to, Ty Mawr will be included in the deposit plan and will count towards supply. Plas Gwylim has been subject to an appeal and court decision and it is not clear at this stage if housing development will take place on this site

Summary: The land is outside of the settlement boundary and in open countryside. There will be an adverse effect on wildlife and the health and well being of the residents of Old Colwyn with the destruction of hedgerows, trees footpaths and nature trails. There is already an acute lack of amenity space in Colwyn. The infrastructure is not in place, all existing roads unsuitable for any increase in traffic. Old Colwyn is already over developed.

Change to Plan: No further development in Old Colwyn

Response: Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's needs. Comments from the Biodiversity and Countryside officer will be taken into account at the development brief/pre-planning application stage, but we will work on the principles of retaining as many natural features of the site as possible, e.g. Trees, hedgerows etc.

27741	Sheila Jackson [6564]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	The local infrastructure will not accommodate 450 units. There are already plans for developing 250-300 units at Ty Mawr, 110 at Plas Gwylm, 5-7 adjacent to 123 Peulwys Lane and flats on Llysfaen Road. This number exceeds the number built in the previous 15 years, therefore the above sites will meet our next 15 years requirement. If this number of large developments continue Colwyn Bay, Old Colwyn and Llysfaen will become one conurbation, which will result in all three losing their identities.		
<i>Change to Plan:</i>	The land running along Peulwys Lane is not suitable for residential development. The reasons were raised by Cllr Bob Squires at the Cabinet Meeting 9th July 2019		
<i>Response:</i>	Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, Agricultural Land Assessments, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's approval. In terms of the other sites referred to, Ty Mawr will be included in the deposit plan and will count towards supply. Plas Gwylm has been subject to an appeal and court decision and it is not clear at this stage if housing development will take place on this site

Summary:

When we came to Old Colwyn fourteen years ago it was a pleasant village. It is now equivalent to a large town, choked by traffic and uncomfortably full of people. My partner and I find it increasingly difficult to get appointments at our health centre, and the bus service has become increasingly irregular with sometimes a wait of over half an hour before any bus turns up. When it does the bus is often over packed with passengers, with old people like my partner and myself having to stand for long periods.

Change to Plan:

Remove the strategic site from the RLDP.

Response:

Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's approval. Arriva have been involved in providing comments to us in terms of the proximity of the bus network.

<i>Total Number of People:</i> 1			
<i>Summary:</i>	I was horrified to learn that a substantial housing estate is planned on green land off Peulwys Lane. The Lane at this point is very narrow and is not designed to take what might amount to another thousand cars. A development of this size will undermine the existing community and the infrastructure is not designed to cope with this scale of building. There is a great deal of water that flows from the hill and the extra strain of more drainage, could have a disastrous effect. I know that the local Doctors' surgery are horrified at the prospect.		
<i>Change to Plan:</i>	I would respectfully request that if you must build more houses locally, it can be done in a more sensitive way, and perhaps more constructively in a semi rural area. Better still would be if the plan is rejected entirely.		
<i>Response:</i>	Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's needs. The Health Board have been consulted. Any drainage issues will need to be resolved to the satisfaction of NRW and CCBC's Environment Comments from the Biodiversity and Countryside officer will be taken into account at the development brief/pre-planning application stage, but we will work on the principles of retaining as many natural features of the site as possible, e.g. Trees, hedgerows etc.

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
28244	Ms Gail Jones [6805]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	The land proposed is outside the settlement boundary and therefore in open countryside. The local secondary school is at this time full and has lost 13 staff to redundancies this year. The one doctor's surgery in Old Colwyn is full. There is a question on the viability of this plan from the point of view of developers. The main issue is the traffic issue. There is no public transport within easy reach of this proposed development. Although there is a need for houses in Conwy people cannot afford three and four bedroom houses.		
<i>Change to Plan:</i>	Remove the strategic site from the RLDP.		
<i>Response:</i>	Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's needs. <i>Total Number of People:</i> 1			
<i>Summary:</i>	The proposal was previously rejected due to it being in open countryside and traffic issues. Llanelian Road is regularly backed up from the roundabout at all times of the day, school times are crazy and match days cause absolute chaos. Our one and only GP surgery has already had to take on additional patients, getting an appointment is difficult. What people need is affordable homes to suit the average wage earned in Wales. Could the Council consider applying a hefty levy on 2nd homes.		
<i>Change to Plan:</i>	Could the Council consider the huge plots of land along Abergele Rd that have abandoned churches on, at least 4 are up for sale, they are in great locations, have great access, are now outdated, useless and unwanted. Remove the strategic site from the RLDP.		
<i>Response:</i>	Noted - The concerns are recognised and will be addressed through various measures put in place during the planning process, for example following the recommendations of Transport Assessments as agreed with the Council's Highways officers, the provision of monies from developers towards schools where this is needed and land for a satellite surgery subject to the Healthboard's needs. The Health Board have been consulted. Comments from the Biodiversity and Countryside officer will be taken into account at the development brief/pre-planning application stage, but we will work on the principles of retaining as many natural features of the site as possible, e.g. Trees, hedgerows etc.

<hr/>			
<i>Total Number of People:</i>		1	
<i>Summary:</i>	Part of the site is shown to be within zone C1 of the Development Advice Maps (DAM) contained TAN15: Development and Flood Risk. The flood mapping shown to impact this site allocation is based on historic flooding (1977 rather than the 1990 Towyn event).		
<i>Change to Plan:</i>	We would advise that if this site is to be taken forward then the flood risks must be fully understood and shown to comply with TAN15 prior to allocation. To fully understand the risks all sources of flooding must be considered along with possible failures of defences and/or blockages to watercourse structure inlets.		
<i>Response:</i>	Noted. CCBC are aware of the flood risk designation and the development layout will be designed accordingly.

<i>Summary:</i>		A lot of work has gone into trying to bring this forward and collaboration with other landowners in the previous LDP with the rest of the allocation. This was discussed at meeting of landowners on 10 September at Conwy Council as was the need for the link road to continue to St George Road and a continued collaboration between landowners to make this happen to help deliver the best infrastructure for Abergele.	
<i>Change to Plan:</i>			
<i>Response:</i>		Noted.

<i>Summary:</i>		Suggest that link road is again included through to St George Road (as per old LDP) to help to reduce traffic flow in town centre and help with sustainable travel.

10.4 Abergele

<i>Representation(s)</i>		<i>No of People</i>	<i>Nature</i>
27427	Mr Oliver Moore [6337]	1	Object
<i>Total Number of People:</i> 1			
<i>Summary:</i>	I am in support of this area being zoned for recreational space, retail (small units i.e. a Co Op convenience store) and a school but strongly object to the use of B1, B2 and B8 in this area. This will have a detrimental effect to the town of Abergele and the existing surrounding highway network cannot sustain such use.		
<i>Change to Plan:</i>	The use of B1, B2 and B8 as well as 15% housing allocation should be removed as the town of Abergele cannot sustain such growth. The fact that the existing Abergele Business Park hasn't developed further should show that this is not a suitable use for this area. The proposed 'new link road' also needs further careful consideration as to whether it is truly required, the money would be better spent improving the existing highway network in and around Abergele.		
<i>Response:</i>	Not accepted. The site will have better access to the A55 being located on the eastern side of town. CCBC continue to work towards resolving the town centre highway capacity issues.

<i>Summary:</i>		On behalf of the landowners with whom we have an agreement to promote the site, we support the Council's plans for mixed use development as outlined for Abergele South East in the Stage 5 Replacement Plan. The specific land upon which we are making representations in 5(a) and 5(b) on the attached plan.
