1. Introduction

- 1.1 The purpose of this background paper is to detail the justification for the removal of a development site (Housing and Employment) from the Revised Deposit Local Development Plan (LDP) in 2011 and/or the proposed allocation of alternative sites as a replacement. The paper sets out the policy context at a national and regional level and in light of this context, recommends an approach for the County Borough. A summary of the site representations are further detailed in the revised LDP Consultation Report.

- 1.2 In preparation of its Preferred Strategy and in meeting the land-use needs of the proposed growth (see BP/2 – ‘Population and Household Projections’), in 2006/07 the Council undertook a call for potential development sites from stakeholders, developers, agents and statutory bodies with the intention of subjecting them to full appraisal to determine their suitability for allocation in the LDP. Via a public notice (see Consultation Report), Town and Community Councils, local Members, developers, landowners, statutory bodies and members of the public were offered the opportunity to submit potential sites. The Council also engaged with public service providers, including the Council’s own municipal waste department, and health and utilities, to identify whether sites for any additional facilities needed to be included in the LDP. Early consultation also took place with developers and landowners to obtain information on potential sites not already identified in the Conwy Joint Housing Land Availability Study (see BP/5 – ‘Housing Land Availability Study’). This was to avoid a substantial number of additional sites coming forward at the examination stage, and to ensure that the LDP strategy was deliverable.

- 1.3 The supporting evidence detailed in BP/21 – ‘Site Deliverability Assessment’ which accompanied the first deposit LDP sets out the full appraisal and justification for site selection. A clear set of criteria/filtering systems were applied to ensure a robust assessment.

- 1.4 In April 2009 the first Conwy deposit LDP was published for consultation. A high number of alternative sites were submitted to the Council for consideration as well as objections and new evidence base to suggest that the proposed allocations were subject to constraints and no longer deliverable over the LDP period.

- 1.5 To address the main concerns identified in the first Deposit LDP, the Revised Deposit LDP was published for consultation in March 2011. Changes to sites from the 2009 to the 2011 Deposit LDP and their justification can be found in the previous version of this Background Paper. The reasons for some of the main changes to the sites included Welsh Assembly Government (now known as Welsh Government) concerns over the level of growth and Environment Agency Wales (EAW) comments on the flood risk in the Towyn/Kinmel Bay area and in the first Deposit. During the consultation period in March 2011, additional potential development sites were submitted for consideration. Sites submitted at this time, along with those received in 2009 were made available for public comment at the subsequent site representations consultation period in November 2011.
- 1.6 Since publication of the Revised Deposit LDP in 2011, evidence from CCBC's Research and Information Unit supports a reduction of the projected population increase over the Plan period (see BP/2). This, combined with the additional representations received and sites submitted have resulted in the changes outlined in this document.

2. Assessing new or alternative site proposals

- 2.1 It is necessary to ensure that the selection of sites is undertaken transparently in order for an Inspector to be confident of a sound process in making changes to a Plan. Under the LDP system there should be far fewer alternative sites (previously termed "omission sites" by the Planning Inspectorate) put forward at the deposit stage, given that landowners, developers and residents will have had a greater opportunity to engage earlier in the LDP preparation process. It is essential that sites accord with the LDP strategy and that the LDP would be sound if included
- 2.2 The proposed replacement sites detailed in the report have also been subjected to Sustainability Appraisal/Strategic Environmental Assessment (SA/SEA) (See BP/10 - SA/SEA)
- 2.3 There are two scenarios that have resulted in the removal of a site from the Revised Deposit LDP:

1. Removed from the LDP but ‘not’ replaced by an alternative. Justification for this could include issues of deliverability as below:

- Further constraints become apparent as a result of new evidence base (e.g. new flood risk data warrants the site highly susceptible to flooding and, therefore no longer deliverable over the Plan period)
- The land owner no longer wishes to develop the land over the Plan period.

In addition, some sites have not been replaced where loss of the site improves the spatial distribution of growth, in line with BP/37 – ‘Growth Distribution Options Report’ and the reduced population and household projections (BP/2).

2. Removal from the LDP but replaced by a more sustainable alternative site. Justification for this could include issues of deliverability as detailed below:

- Whether the new alternative site represents a more sustainable location in terms of assessment against the Council’s Hierarchy of Settlements and Sequential Test (e.g. the site presents a more realistic option for development as it falls within an existing urban location/settlement boundary, is a brownfield site and represents a more sustainable location in terms of the site’s links to key facilities and services).
- Sustainability Appraisal/Strategic Environmental Assessment (SA/SEA).
- Whether the new alternative site is available for development now and would help provide the required certainty to developers and the local community in delivering the Growth Strategy within a specific and realistic timeframe.

2.4 Tables 1, 2, 3, 4 & 5 below detail the sites proposed for removal/replacement and overall allocation. The site reference numbers given in the table (e.g. Ref: LDP H1) are for the purposes of this BP only to enable ease of connection with other sites.
