

TIME TO TALK

Our best place is face to face

- Before a child can speak they communicate through eye contact, smiling, gurgling and crying
- Sit where your child can easily see you while you talk and play
- When you're face to face with your child you can see what they're trying to tell you and they can learn about facial expression and how you're making your words
- Keep your child close when you talk to them. Look at them when they're talking to you
- It's easier to hear and understand each other when you're face to face
