

TIME TO TALK

Playing peekaboo

Playing peekaboo is so simple but it also helps your child's development in so many ways:

- It helps your child learn about 'object permanence' - they learn that you're still there even if they can't see you
- It develops your child's language skills and encourages them to make eye contact and read facial expressions
- It develops your child's motor skills as they learn to copy you and cover their eyes
- It'll also help with their social skills and teaches them to take turns and how to play with others
