

# TIME TO TALK

## Talk, talk, talk - Please talk to me

- Your child needs to hear the same words again and again so that they can remember them
- Saying words more than once helps them to say many words
- Take turns at talking to your child
- Copy their sounds/words back to them
- Tell them what they can see and what's around them
- Tell them everything about what they can see, hear, touch, taste and smell
- Remember your child may need more time to choose and use their words. Please wait for them to talk
- Use new words with your child to encourage language development
