

LEARN THROUGH PLAY

Egg number puzzles

You'll need:

- Paper or card
- Marker pens
- Scissors

Method:

- Using the marker pen, draw several egg shapes on the paper
- Draw a number at the top of the egg shape and the same number of dots at the bottom
- Your child can get involved at this stage by decorating/colouring the eggs
- Cut the egg shapes out of the paper
- Cut the egg shapes in half - use different patterns: waves, zig-zags, etc.

LEARN THROUGH PLAY - Eggy number puzzles

to make it more interesting when your child joins the two pieces back together

- Time to play!
- Ask your child to match the puzzle pieces
- Did they get it right? Well done. As they complete the puzzle point out the numbers at the top and count the dots at the bottom

Why not?

- Start off with numbers 1 to 5 and then add more numbers as your child learns?

The benefits of this activity:

- It will help with your child's number recognition and counting skills

CAUTION:
Close supervision
is needed when
using scissors!
