

LEARN THROUGH PLAY

Gadget board

Encourage your child's natural curiosity for things around the home with a gadget board.

You'll need:

- Items from around the home - why not try: a light switch box, a remote control, a carpet sample, a mirror, a slide lock, a bike bell?
- A piece of wood or thick cardboard
- Screws or strong glue to attach the items to the wood/cardboard

Method:

- Securely attach the items to the board and let your child play

LEARN THROUGH PLAY - Gadget board

- You can add to the board at any time as your child gets older

Why not?

- Do an online search for ideas of what to use?

The benefits of this activity:

- This is a fun way for your child to develop their fine motor skills and hand eye co-ordination

CAUTION:
Close supervision
is needed with
batteries and
small parts!
