

LEARN THROUGH PLAY

Toilet roll printing

Rather than recycle them, why not put your toilet roll tubes to good use?

- You just need toilet roll tubes, some paper and some paint
- This activity will encourage your child's imagination and creativity
- It will develop their shape and colour recognition
- It will improve their hand eye co-ordination
- It can be done with paint, food colouring, water or even mud
- Why not do an online search for more children's activities that use toilet roll tubes?
